Action: **Affirmed**	Action: **Affirmed**

Assessment Descriptors

Balance Sheet Strength	**Very Strong**
Operating Performance	**Adequate**
Business Profile	**Limited**
Enterprise Risk Management	**Appropriate**

Rating Rationale

Balance Sheet Strength: Very Strong

- Strongest level of risk-adjusted capitalization, as measured by Best's Capital Adequacy Ratio (BCAR) at the VaR 99.6% level. This position is supported by the company's low underwriting risk and conservative investment allocations consisting primarily of cash and short-term investments, with minor allocations to high-quality long-term bonds.
- Financial flexibility is available through the company's much larger parent organization, Core Specialty Insurance Holdings, Inc. (Core Specialty).

Operating Performance: Adequate

- Operating under a new business plan since being acquired by Core Specialty in the fourth quarter of 2023.
- Earnings are centered around fee income for the fronting of medical stop-loss business.

Business Profile: Limited

- The company operates as a division of the greater Core Specialty organization.
- Products are mainly medical stop-loss for which the company only retains a minimal net exposure to after reinsurance cessions.

Enterprise Risk Management: Appropriate

- Standard Life and Accident Insurance Company's ERM is now part of Core Specialty, following its acquisition in 2023. Core Specialty's ERM is supported by a comprehensive risk management framework.
- A three lines of defense system is utilized, which is overseen by the Board Risk Committee.
- ERM capabilities and functions are adapting with the growth in the overall business.

Outlook

- The stable outlooks reflect the company's very strong balance sheet strength, adequate operating performance and limited business profile.

Rating Drivers

- Positive rating action could occur due to further integration into the greater Core Specialty Insurance Holdings group, either through enhanced explicit or implicit support.
- Factors that may result in negative rating action include a significant decline in key balance sheet strength metrics, including risk-adjusted capitalization.

Credit Analysis

Balance Sheet Strength

The company maintains very strong balance sheet strength through its low net exposures, minimal legacy underwriting risk and conservative investment allocations.

Capitalization

The company's risk-adjusted capitalization, as measured by BCAR, is measured at the strongest level following its acquisition by Core Specialty Ins Holdings. This position is driven by the company's low level of retained business.

Balance Sheet Strength (Continued...)

SLAICO's capital position changed significantly as a result of its acquisition. Prior to its sale, a dividend of $278.9million was paid to American National, resulting in capital and surplus of roughly $33 million at year-end 2023. This capital has grown to roughly $46 million as of 2Q 2025. While this capital is sufficient to support the low levels of retained business the company will write as a part of Core Specialty, it also benefits from the flexibility the much larger Core Specialty provides.

Asset Liability Management - Investments

The company's investments are highly conservative, consisting of only 44.9% in long-term NAIC 1 bonds and the remainder in cash & short-term investments at year-end 2024. Since the acquisition of the company, the investment portfolio has become more streamlined, as the company no longer holds mortgage and contract loans and all held bonds are now class 1 with the vast majority maturing within 5 years (average duration of 1.5 as of year-end 2024). While the investment portfolio could shift to become more in line with the greater group in coming years, Core Specialty also maintains a conservative portfolio, so changes would likely not result in material impact to investment risk.

Reserve Adequacy

As part of the acquisition, effective December 1, 2023, the company entered into a 100% indemnity reinsurance agreement with American National, then ceding approximately $118.2 million of life, annuity, and accident and health insurance (excluding medical stop loss) liabilities. This reinsurance agreement was executed in tandem with an administrative services agreement which names American National as the administrator for the ceded business.

SLAICO was transferred with a clean balance sheet in terms of reserves with only a small amount of accident/health reserves remaining. It is anticipated that reserves will not have a material impact on operating returns and financial strength, given the company's minimal net retention levels.

Holding Company Assessment

The ultimate parent is the holding company, Core Specialty Insurance Holdings, Inc, which is wholly owned by the intermediate holding companies Starstone US Holdings, Inc. and Lancer Financial Group, LLC. It holds roughly $1.4 billion in equity at year-end 2024. The company holds a small amount of preferred shares ($165million), a revolving credit facility and various junior subordinated debt issues, which relate to its merger with Lancer Insurance Group, which brings the debt leverage to 30.2%. These preferred shares convert into common shares upon completion of an initial public offering or other specific events.

Operating Performance

Operating performance for SLAICO has been somewhat in flux since the acquisition by Core Specialty. In the past, performance was influenced by multiple lines of business. Under Core Specialty ownership, the company will focus on Medical Stop-Loss business exclusively and maintain only minimal exposure on a net basis.

The company entered into multiple reinsurance agreements during 2023. This included a 100% quota share agreement, effective December 1, 2023, to cede all Life, Annuity and A&H (excluding purchased Medical Stop Loss programs as defined by the Stock and Asset Purchase Agreement) to American National Insurance Company; and three separate 100% quota share agreements, each effective December 1, 2023, to assume select Medical Stop Loss policies, as defined by the Stock and Asset Purchase Agreement, from American National Insurance Company, American National Insurance Company of Texas, and Garden State Life Insurance Company respectively.

In 2024, SLAICO produced $485 million dollars in gross premium, with the majority ceded out through existing partnerships for total net premiums written of only $29 million. The company posted net underwriting income of $6.6 million and net income of $6.8 million

Operating Performance (Continued...)

in the same time frame. The company planned to non-renew roughly $83 million of 2024's gross premiums, projecting 2025 gross premiums of only $374 million.

Business Profile

The following text relates specifically to Standard Life and Accident Insurance Company (AMB# 007070):

Standard Life and Accident Insurance Company (SLAICO) is a life insurance company currently licensed in 46 states and the District of Columbia. It is domiciled and incorporated in the State of Texas. SLAICO was acquired by Core Specialty in December of 2023. The company operates within the greater Core Specialty organization, supporting the Medical Stop-Loss Division. This division is headed by Jim Stelling. Jim was most recently the Executive Vice President, Health Insurance and Specialty Markets Group Operations at American National Insurance Company. Additionally, during his tenure at American National, Jim led health insurance operations and supported the stop-loss business serving as Senior Vice President, Health Insurance Operations and as Vice President of Group and Health Compliance.

The acquired business has grown to produce over $450 million of gross premium in 2024. It is distributed by Managing General Underwriters and cedes or retrocedes the majority of the premium and risk associated with the programs underwritten. Stop-loss coverage is used by employers to limit their exposure under self-insured medical plans. Specific stop-loss provides coverage when claims for an individual reach a threshold; after the threshold is reached, the policy reimburses claims paid by the employer up to a coverage limit for each individual. Aggregate stop-loss reimburses the employer once the group's total paid claims reach a threshold.

The company maintains very little exposure on a net basis, as the bulk of the business is ceded and retroceded to existing partnerships. The portfolio is a diversified mix of small, medium and large employer focused businesses.

The following text is derived from Best's Credit Report on American National Group (AMB# 070166):

The American National Group (the Group) was acquired by Brookfield Reinsurance, Ltd. (BNRE; now known as Brookfield Wealth Solutions Ltd or BWS) in May of 2022 for a total of $5.1 billion. This has created a domestic insurance presence for BWS, which is an important part of its overall strategy. Under its new ownership structure, the American National Group will continue to operate as it has historically, with its headquarters remaining in Texas and under the oversight of its current management team. The Group is made up of several companies that offer a diverse product portfolio of life, annuity, accident & health, and pension risk transfer products. The companies that comprise The Group are: American National Insurance Company (ANICO), American National Life Insurance Company of Texas (ANTEX), Garden State Life Insurance Company (GSLIC), and American National Life Insurance Company of New York (ANICONY).

Business Profile (Continued...)

ANICO currently offers a variety of individual and group annuity products. They previously offered a broad line of insurance coverage, including individual life, health, disability, and annuities. They also offered group life, health, annuities and credit insurance. Products are marketed through a diverse network of distribution systems, which includes home office, multi-line, group brokerage, credit, and independent third-party marketing organizations.

ANTEX has no significant amount of business remaining after the RGA reinsurance transaction in 2024 and is in run-off mode.

GSLIC’s life premium consists of renewal business only, and currently has insignificant amount business remaining after the RGA reinsurance transaction in 2024.

ANICONY markets annuity products to rural and suburban upper-middle income clients, predominantly in New York.

The group also entered the pension risk transfer (PRT) space in 2023. They were a top 15 writer of the business in their first year and rose to top 10 for the first nine months of 2024. They are looking to grow this business, as well as annuity business, in order to leverage their asset management strength.

Distribution is comprised of the following groups: Independent Marketing Group (IMG), Career Sales & Service Division (CSSD), and Multiple Line Agencies.

Independent Marketing Group - The Independent Marketing division sells life insurance, annuities, and pensions, targeting the middle income and affluent marketplace. Distribution is through financial institutions, large marketing organizations, employee benefit firms, broker-dealers, and independent brokerage agencies. IMG also markets to individuals who prefer purchasing life insurance directly from an insurance company, through outbound call centers.

Career Sales & Service Division - CSSD markets life insurance, annuities, and supplemental health insurance to the lower and middle-income marketplaces. Distribution is through employee agents.

Multiple Line Agencies- Markets life insurance, annuities, pension plans, and property/casualty products, and is exceptionally strong in agribusiness. Primary markets are individuals, families, farmers, ranchers, and small business owners, and distribution is mainly through dedicated agents.

The group has ceased writing life insurance products and has reinsured much of its remaining life insurance risk. It will focus heavily on annuities. The growth in concentration in annuities is deemed to have an unfavorable impact on overall product risk.

Enterprise Risk Management

Core Specialty's enterprise risk management (ERM) function is considered to be supportive of the 'appropriate' assessment. The group has in place a comprehensive and reasonably sophisticated ERM framework with defined risk appetites and active monitoring. A three lines of defense system is utilized, which is overseen by the Board Risk Committee and Enterprise Risk Committee. Core Specialty has an internal risk and capital model which is used for capital adequacy assessments, to support the risk appetite framework and to support risk-adjusted performance measures.

As a rapidly growing and evolving organization, Core Specialty has required a nimble approach to risk management in recent years. The key strategic risks currently identified by the company include reserves and investments. In 2022, the group introduced an Enterprise Risk Committee charter at the management level, which now meets quarterly and precludes meetings of the Board Risk Committee. As the group matures and evolves, so has ERM thus far. In recent years the group introduced various policies and guidelines to the Board Risk Committee related to various parts of the business.

In recent years, Core Specialty has been able to increase the flexibility of it's ERM processes through the onboarding of various employees/operations through acquisition. Additionally, the company was able to expedite the onboarding process for the Hallmark business, following downgrades to the company writing the business in the interim. As the company matures, its ERM processes are aligning more with publicly traded peers.

Reinsurance Summary

In 2015, Harbour Life, an unauthorized reinsurer based in the Bahamas, was unable to meet its reinsurance obligations, resulting in SLA retaining claims. This treaty was replaced by new treaties with Maiden Reinsurance North America, Odyssey Reinsurance Company, and Greenlight Reinsurance, Ltd. that will provide, in total, the same 90% quota share commercial stop loss coverage to employer groups. The 100% excess loss coverage over $1 million that is provided by Navigator Insurance Company is unchanged.

Maximum net retention is $100,000 for individual life, $100,000 for group life, and $50,000 for individual accidental death.

Environmental, Social & Governance

AM Best views the greater Core Specialty group's core ESG exposures to be both climate risk and social inflation trends. The group has an expanding property book of business, which could be subject to elevated catastrophe losses related to the trend of higher frequency and severity of weather events in recent years. Additionally, the group has a large commercial casualty book of business which could be impacted by social inflation trends in the North American market. The group recognizes these exposures and has taken steps to mitigate future losses where applicable, and adequately compensate for the risk where mitigation is more restricted.

Rating Lift/Drag

Standard Life benefits from the group's operations and management, and is critical to the group's strategy as well as being fully integrated into the group's operations. The parent is willing to support the company if necessary.
