Rating Rationale

Balance Sheet Strength: Strongest

- The risk-adjusted capitalization of Assurity Life Insurance Group (Assurity Life Group), as measured by Best's Capital Adequacy Ratio (BCAR), is assessed as being at the strongest level and supports the group's business, investment and insurance risks. Additionally, the balance sheet maintains ample liquidity and a capital base driven by retained earnings.
- The group's invested asset portfolio is primarily of good credit quality, holding highly rated investment-grade bonds while attempting to enhance total yield through commercial mortgage loan holdings, private placements, securities lending, and Federal Home Loan Bank borrowing.
- While mortgage holdings are elevated relative to the life industry average, this portfolio has performed with very few troubled loans over the past decade, supported by good loan-to-value ratios and debt service coverage ratios.
- Moderate but prudent use of reinsurance, with a reinsurance leverage ratio well below the life industry average.

Operating Performance: Adequate

- Assurity Life Group has reported consistently profitable operating results, providing good earnings diversification with pre-tax and net of tax operating gains from ordinary life, individual annuities, group life, group annuities, and group accident & health (A&H) business.
- Direct and net written premium have exhibited year-over-year growth since 2021, after a period of inconsistent growth largely driven by a planned decline in single-premium products.
- The statutory net investment yield for the group in 2024 was in line with peers and industry averages.
- Return on asset ratios on a statutory basis are in line with peers and the life industry. Return on surplus ratios are also in line with peers but below the life industry average due largely to the higher capital level relative to the industry.

Business Profile: Limited

- Assurity Life Group has good geographic and product diversification. The group is licensed in all 50 states plus the District of Columbia, with no single state accounting for more than 14% of total direct written premium.
- The group is active in its innovation activities through insurtech startups. This has resulted in the formation of multiple partnerships, which have led to premium production and the creation of new products.
- Competition in both the individual life and worksite lines is high (especially from larger organizations). Despite the lack of significant market share, net written premiums have grown every year from 2021, including 6.6% in 2024.

Enterprise Risk Management: Appropriate

- Assurity Life Group takes a long-term view of enterprise risk management, emphasizing processes that monitor and manage risks in a structured and transparent fashion across the entire organization, while often soliciting input from the employee base to identify its major risk areas.
- Key risk indicators and tolerances within the risk appetite statement are reviewed and reported as part of the monthly risk and financial reporting process. The group tracks its top risks and assigns these to risk owners who are responsible for managing and monitoring these risks.
- Comprehensive annual actuarial memorandum that conducts cash flow testing using seven interest rate scenarios based on the 1990 version of the NAIC Model Actuarial Opinion and Memorandum Regulation, sensitivity testing, and stochastic scenarios, which has consistently produced favorable results in the aggregate despite some unfavorable results on a per line basis.

Outlook

- The stable outlooks reflect Assurity Life Group will maintain the strongest level of balance sheet strength assessment, while pursuing profitable premium growth.

Rating Drivers

- A negative rating action could occur if the group's risk-adjusted capitalization were to significantly decline.
- A negative rating action could occur if the group's operating performance were to show a trend of deterioration.

- While unlikely, a positive rating action could occur if there were to be a sustained improvement in operating performance growth trends.

Credit Analysis

Balance Sheet Strength

Assurity Life Group's ("Assurity" or the "company") balance sheet strength is supported by its strongest level of risk-adjusted capitalization, overall good credit quality of invested assets, relatively low use of reinsurance and good liquidity management. Liquidity ratios are comparable to peers and the life industry average.

Capitalization

Assurity's risk-adjusted capitalization as defined by the Best Capital Adequacy Ratio is at the strongest assessment and supports the group's insurance, business and investment risks. BCAR ratios have remained consistent in recent years, reflecting stability in the company's balance sheet composition and level of capitalization. Assurity's total capital has consistently increased over the previous five years stemming predominantly from profitable operations. Capital and surplus at year-end, 2024 was $436 million, up from $434 million in 2023. The main drivers of the increase in surplus include net income and unrealized gains, partially offset by an increase in the asset valuation reserve and various increases to non-admitted assets. Quality of capital is positively impacted by no financial leverage and appropriate use of reinsurance with highly rated carriers.

Asset Liability Management - Investments

Invested asset allocations at year-end 2024 consist of bonds (64.9%), commercial mortgages (17.4%), common stocks (4.7%), and contract loans (5.1%), with the remainder in real estate, preferred stocks, cash & short-term, and securities lending.

The fixed income portfolio is comprised of approximately 99% investment grade holdings, consistent with the prior five years. Assurity continues to maintain higher-than-industry average investments in private placements, with slightly over 40% of bonds classified as private issues. Assurity has kept investment grade bond allocations between NAIC class 1 and class 2 issues consistent over the previous five years, favoring the higher quality class 1 issues. Common stock holdings are represented by diversified index mutual and exchange-traded funds as part of a long-term buy-and-hold strategy. The company does not directly invest in any derivatives, sub-prime mortgages, Alt-A mortgages, mortgage structured securities or collateralized debt obligations. Overall, Assurity's investment returns are in line with the average for U.S. life insurers, and has adjusted well to the higher interest rate environment.

Assurity has maintained a focus on both commercial mortgage lending and private placement bonds to enhance yield. The company believes both provide an attractive risk/reward trade-off, while decreasing emphasis on government bonds. Assurity began the purchase of federal tax credits in 2013, which continues to provide enhanced returns. These investments provide a high risk-adjusted rate of return and are generally limited by the expected amount of Assurity's federal income tax liability.

Performance of the mortgage portfolio, making up about 17.4% of invested assets, has been very strong, with no properties obtained via foreclosures and minimal delinquencies in the last 10 years. The allocation to mortgage loans is elevated relative to the life industry average. The incremental rate differential earned on a mortgage over a bond enhances overall yield, however, this asset class does lack the level of liquidity of public bonds, but does provide structural liquidity from cash flows and facilitates liquidity in its use as collateral

Balance Sheet Strength (Continued...)

for FHLB borrowings. The company does not anticipate significant changes in the asset allocation from the current level. The company's mortgages are secured primarily by commercial properties with no single state concentrations exceeding 12% of the total. The mortgage portfolio includes seasoned loans with low loan-to-value (LTV) ratios and are predominantly industrial, office and retail properties. Commercial mortgages are underwritten with a maximum 70% LTV ratio, and the company has obtained full or partial personal recourse from the borrowers on over 96% of these loans.

Reserve Adequacy

Based on the cash flow testing results, no reserve strengthening was recommended as of year-end 2023 and 2024.

Balance Sheet Strength (Continued...)

Holding Company Assessment

Assurity Group, Inc., is a non-insurer mutual holding company incorporated under the laws of the state of Nebraska. Assurity Group, Inc. wholly-owns an intermediate non insurer stock holding company, Assurity Holdings, Inc. Assurity Holdings Inc. wholly-owns a stock life insurance company, Assurity Life Insurance Company. Owners of designated policies issued by Assurity Life Insurance Company have membership interest in Assurity Group, Inc.

The Assurity Group, Inc. has no business operations except its ownership of Assurity Holdings Inc. Assurity Holdings Inc. also has no business operations except its ownership of Assurity Life Insurance Company. Policyholders of Assurity Life Insurance Company are members of Assurity Group, Inc., yet policy obligations remain at Assurity Life Insurance Company.

Operating Performance

Assurity has reported consistently positive pre-tax operating results, with favorable earnings diversification across individual life, individual annuities, group life, group annuities, and accident and health lines of business, despite some fluctuations in both life and health claims experience, new business expense strain, and policyholder dividends. Despite the impact of new business strain on operating results in recent years, return on asset metrics have been favorable compared to direct peers and in-line with the industry. Assurity's large capital base relative to the risk exposure of the company has resulted in return on equity metrics lagging the industry, though comparisons to peers are favorable.

The company experienced growth on both a direct and net written premium basis in 2024, driven primarily by accident and health products, with additional contributions from annuity and group life. Net premiums written through the third quarter of 2025 are above results achieved in the same period in the prior year and have increased by roughly 7.0%. Recent historical premium growth has come from the company's core accident and health products. Approximately half of the premium growth in 2024 was sourced from disability income and supplemental health products. The company resumed marketing of interest sensitive single premium products in 2022, after a decade of de-emphasis due to the low interest rate environment, which has also contributed to recent premium growth.

Although fluctuations in accident and health claims experience can lead to volatility in operating results, Assurity has reported a generally positive health claims experience compared to expectations in recent years, continuing into 2025. New business expense strain from consistent year-over-year premium growth and COVID-era elevated mortality have been a drag on operating performance in recent years.

Business Profile

Assurity is focused on offering life and supplemental health protection products to the middle-income market and small businesses through multiple distribution channels. Life insurance product offerings include whole life, term life, and universal life insurance. Assurity's supplemental health product offerings include disability income, accident expense, critical illness, hospital indemnity, and accidental death. Assurity also offers fixed deferred and immediate annuities.

Assurity markets through three distribution channels - Individual Sales, Worksite Sales and Assurity Ventures/Insurtech. The company works with independent distribution in all channels. Assurity offers protection products focused on middle income consumers. Assurity established a New York subsidiary in 2016, which enables distribution in all 50 states and D.C. Michigan has the greatest premium concentration primarily due to A&H business however, it still represents less than 14% of total direct premium written indicating favorable diversification across the country. The Individual Sales channel markets fixed life, annuity, disability income and other specialty health products through a large system of independent brokers and agents. After de-emphasizing annuity sales in the prior decade, due to the low interest rate environment, Assurity reintroduced its fixed annuity product in 2022, and continues marketing these products in limited capacity.

The Worksite Sales channel markets life and accident and health products to individuals through their employer. Product offerings include whole life, term life, short-term disability income, hospital indemnity, accident expense and critical illness products. Worksite Sales started from a modest base, but have significantly increased on a percentage basis over the past five years. The target distribution for worksite is the classic worksite broker and mid-sized sophisticated independent employee benefit brokers, with over 2,000 agents contracted. Expanding its geographic profile, continually updating the product portfolio, and streamlining business operations are initiatives Assurity has undertaken to grow its worksite business.

Assurity's innovation efforts around technology offerings and formation of Assurity Ventures, Inc. have led it to form partnerships with some insurtech companies for distribution of individual life and health products, which has shown promising growth. The Assurity Ventures/Insurtech channel has accounted for roughly 5% of new individual annualized premium in 2024.

Enterprise Risk Management

Assurity has formal enterprise risk management (ERM) process and views it as a continuous process of risk identification, understanding, evaluation, prioritization and management. Embedded throughout the organization in many forms, company management solicits input from its employee base in identifying the top risks facing the company, providing senior management with insight into different risks pertaining to different areas of the organization, as well as strengthening a risk awareness culture throughout the organization. To facilitate the risk assessment and priorities, a risk map and definitions are utilized to categorize risks into an operation, compliance and financial risk viewpoint.

In a continuous effort to improve the effectiveness of its ERM process, management has adopted a formal risk appetite statement. Key risk indicators and tolerances are reviewed and reported on corporate and department scorecards on a monthly basis, with the top risks assigned an owner responsible for managing the risk. The Strategic Leadership Team (SLT) serves as the corporate risk committee, which identifies and assesses risks with input from managers throughout the company. Risks are prioritized based on frequency and severity, with this process repeated annually and updated as appropriate.

Management has previously performed a gap analysis of Assurity's ERM process relative to the NAIC Risk Management and Own Risk and Solvency Assessment Model Act (ORSA), despite the company being exempt from the ORSA requirement in an effort to maintain a strong ERM program as well as identify best practices in enterprise risk management. This led to improving the documentation and governance of the ERM program including the development of a written risk policy approved by the Board of Directors.

Reinsurance Summary

Reinsurance counterparties for Assurity are primarily Hannover Life Reassurance Co of America, Munich American Reassurance Company, Scor Global life USA Reinsurance Company, Swiss Re Life & Health America Inc, and General Re Life Corporation.

The overall retention for individual life business is $275,000 per life, and on group life business, it is $80,000 per life. On disability income business, company retention is $3,000 of monthly benefit per life on benefit periods of 10 years or less and $1,500 of monthly benefit on benefit periods greater than 10 years.

Environmental, Social & Governance

AM Best considers Assurity Life Group’s exposure to material environmental, social and governance (ESG) risks to be low. The company operates in an environment where its underwriting activities have low exposure to climate risk, and its underwriting and investment profiles are not heavily exposed to assets and industries considered by some to be problematic. The company operates mostly in line with market peers, and at present ESG factors are unlikely to impact the credit quality of the company over the short-term. There are no regulatory requirements relating to ESG, although the company regularly monitors developments to ensure its practices are compliant.

A Best's Financial Strength Rating opinion addresses the relative ability of an insurer to meet its ongoing insurance obligations. The ratings are not assigned to specific insurance policies or contracts and do not address any other risk, including, but not limited to, an insurer's claims-payment policies or procedures; the ability of the insurer to dispute or deny claims payment on grounds of misrepresentation or fraud; or any specific liability contractually borne by the policy or contract holder. A Financial Strength Rating is not a recommendation to purchase, hold or terminate any insurance policy, contract or any other financial obligation issued by an insurer, nor does it address the suitability of any particular policy or contract for a specific purpose or purchaser.

A Best's Issue/Issuer Credit Rating is an opinion regarding the relative future credit risk of an entity, a credit commitment or a debt or debt-like security.

Credit risk is the risk that an entity may not meet its contractual, financial obligations as they come due. These credit ratings do not address any other risk, including but not limited to liquidity risk, market value risk or price volatility of rated securities. The rating is not a recommendation to buy, sell or hold any securities, insurance policies, contracts or any other financial obligations, nor does it address the suitability of any particular financial obligation for a specific purpose or purchaser.

In arriving at a rating decision, AM Best relies on third-party audited financial data and/or other information provided to it.
