Guide to Best's Credit Ratings

Market Segment Outlooks

Financial Data Presented
Financial data in this report: (i) includes data of affiliated entities that are not rating unit members where analytics benefit from inclusion; and/or (ii) excludes data of rating unit member entities if they operate in different segments or geographic areas than the Rating Unit generally. See list of companies for details of rating unit members and any such included and/or excluded entities.

The financial data in this report reflects the most current data available to the Analytical Team at the time of the rating. Updates to the financial exhibits in this report are available here: Best's Financial Report.

Rating Unit - Members
Rating Unit: Global Atlantic Group | AMB #: 069786

AMB #	Rating Unit Members	AMB #	Rating Unit Members
061755	Accordia Life and Annuity Co	009053	Forethought Life Ins Co
008491	Commonwealth Annuity and Life	071815	Global Atlantic Assurance Ltd
007086	First Allmerica Financial Life	061738	Global Atlantic Re Limited

Rating Rationale

Balance Sheet Strength: Very Strong

- Risk-adjusted capitalization continues to be assessed as strong as measured by Best's Capital Adequacy Ratio (BCAR) in support of its insurance, investment, and operational risks. The organization has demonstrated a sustained trend of strong-assessed capitalization.
- Growth in financial flexibility has been supported by consistently strong earnings, access to debt in the financial markets, and contributions from the holding companies. The group's parent company, KKR & Company Inc. (NYSE: KKR), is anticipated to continue to bolster balance sheet support as it has demonstrated over the last few years.
- The investment portfolio maintains an elevated allocation to structured securities and other non-traditional fixed-income assets relative to industry averages and is supported by appropriate capital levels required to manage the risk associated with these types of assets.
- The organization has demonstrated financial flexibility and asset/liability management (ALM), supporting the capital position and overall balance sheet.

Operating Performance: Adequate

- Global Atlantic Group (Global Atlantic) has reported strained statutory operating results stemming from annuity growth. GAAP results have been more favorable.
- Premium growth continues to report strong growth trends both from the group's individual markets and the institutional markets.
- Ceded reinsurance transactions over the past several years are currently producing a positive impact on earnings with long-term beneficial impacts on earnings expected. The variability in the size and business type of the reinsurance transactions will likely create some volatility in earnings.

Business Profile: Favorable

- The group's affiliation with KKR provides Global Atlantic with greater access to third-party capital, the ability to generate higher risk-adjusted returns, and increased financial flexibility. In addition, the affiliation with KKR is anticipated to support continued new business growth opportunities and generate improved risk-adjusted returns, along with increased financial flexibility.
- Global Atlantic has a diversified liability profile in multiple channels to include individual markets, institutional markets, and currently, international expansion. The group is one of the leaders in the pre-need and annuity space.
- Global Atlantic is a leading reinsurance provider of block in-force liabilities, and it has added pension risk transfer and flow reinsurance capabilities as it looks to increase its overall business diversification. The group has completed various block transactions and flow reinsurance agreements in recent years.
- Global Atlantic has several distribution partners spanning a variety of financial intermediaries, financial advisors, and funeral homes, among other distribution partners.

Enterprise Risk Management: Appropriate

- Global Atlantic has a well-defined risk management framework, with a formal risk appetite and strong capabilities in support of its elevated risk profile.
- The risk profile is viewed as higher risk due to the complexity of the group's organizational structure, reserve profile, and allocation to non-traditional investment securities.
- The group has demonstrated strong data analytics capabilities, which it uses to frequently stress its capital and investment portfolio, as well as hedge its product risks.
- The group both cedes and assumes premiums from counterparties, most of which, have high credit ratings.

Outlook

- The stable outlooks reflect AM Best's expectation that the group will maintain its very strong balance sheet strength assessment as well as sufficient operating performance, while sustaining modestly profitable premium growth.

Rating Drivers

- Negative rating action may occur if there is a material decline in the balance sheet metrics of the group.
- Negative rating action may occur if there is a material deterioration in business profile metrics.
- While unlikely, positive rating action may occur if there is a sustained favorable development in operating performance metrics.

Credit Analysis

Balance Sheet Strength

AM Best notes that Global Atlantic's strategy to originate business in its US operations and cede the majority of liabilities to its offshore entities, which materially under reports the balance sheet and operating performance in the statutory financials. Additionally, reinsurance transactions between affiliates can cause large volatility in the group's statutory results.

Capitalization

Global Atlantic's consolidated statutory balance sheet has grown significantly over the past five years and is expected to be supported further by KKR & Co. Inc.'s 100% ownership of the group. KKR & Co bought the remaining 37% of Global Atlantic at the beginning of 2024 in an all cash deal worth $2.7 billion. Statutory capital growth has been driven by historically strong operating performance. AM Best notes that statutory capital has also benefited from support from the parent holding company in the form of surplus notes and capital contributions. Risk-adjusted capitalization, including its offshore reinsurers, is assessed as strong but faces pressure from the group's high growth in its individual markets and sizable reinsurance transactions in its institutional markets. In addition, the company owns a large amount of reported affiliated bonds on its balance sheet. This is primarily due to the affiliate relationship of KKR which serves as Global Atlantic’s asset manager, and due to the structure of how certain investments are held on the insurance company balance sheet. AM Best notes that there is modest financial and operating leverage held at the insurance operations in the form of affiliated surplus notes and borrowings from the FHLB.

Due to the use of purchase accounting for the acquisition of Global Atlantic by KKR, there exists noise in the GAAP financial statements for the holding company which makes year over year comparison of financial results less clear. Future GAAP statements will provide a more clear historical performance view of the consolidated group moving forward.

Asset Liability Management - Investments

Global Atlantic's investment strategy focuses on reducing the volatility of cash flows and matching the interest sensitivity of its liability profile, by allocating its funds to fixed income securities and commercial mortgages loans with limited allocations to non-affiliated equities and alternative assets. Relative to industry averages, the group holds elevated allocations to structured securities, focusing primarily on residential and commercial mortgage-backed securities (RMBS and CMBS), asset-backed securities (ABS), and collateralized loan obligations (CLO). The company has expanded its direct lending program, which includes commercial mortgage loans (CML), residential real estate, and specialty finance lending, due to the enhanced yields and stable cash flows.

Balance Sheet Strength (Continued...)

AM Best notes that the portfolio is viewed as high credit quality with allocations to NAIC 2 and below investment grade bonds that are below industry averages. Additionally, Global Atlantic has been reducing allocation to lower rated structured securities. However, the portfolio overall is viewed as higher risk due to the complexity and reduced liquidity of its more esoteric investment classes.

Additionally, Global Atlantic uses various derivative securities to hedge its liability risks, including the equity credit component of its indexed universal life products and fixed indexed annuity products as well as the guaranteed benefits on the variable annuities. AM Best notes that the statutory statement valuations for its derivative options can cause volatility in statutory earnings that are typically related to unrealized performance. Additionally, the company is subject to differing accounting treatment for these derivatives based on the state of domicile of its insurance entities.

Operating Performance

Global Atlantic has generally reported strong sales and earnings growth on a consolidated basis. Sales growth has been primarily driven by the company's individual annuity and institutional reinsurance lines. The company is a leading provider of annuities in the bank and broker-dealer markets, and continues to focus on adding distribution partners and increasing penetration among existing partners. Global Atlantic's institutional reinsurance business can be notably lumpy as the opportunities for large reinsurance transactions are dependent on market conditions and can have a highly competitive bidding process, although the company also negotiates bilateral reinsurance transactions. The group began to assume fixed and payout annuities from two transactions in 2018 and has significantly grown their reinsurance segment over the past six years. The company is expanding its appetite for flow reinsurance and pension risk transfer agreements through partnership agreements. Global Atlantic is expected to continue their growth in the reinsurance space in 2025.

The company's life operations have reported generally consistent sales growth, but are only a modest proportion of consolidated results. Sales of the company's pre-need products have experienced substantial growth through year end 2024 as Global Atlantic has become a larger entity in this space.

AM Best notes that Global Atlantic's earnings are largely driven by the spread earned between investment yields and policy holder crediting rates as the vast majority of its product liabilities relate to its fixed rated and indexed annuities and its indexed universal life products. The group actively manages the guaranteed minimum interest rates (GMIR) on offered new policies as interest rates decline, and as a result, has only a small proportion of policies with high GMIRs relative to industry averages. Furthermore, legacy annuities with high GMIRs were mostly assumed in reinsurance transactions that were priced using lower interest rate assumptions. The low GMIR's and its strong ALM capabilities have allowed the company to earn favorable spread margins while maintaining a large cushion between its current crediting rates and its weighted average GMIR. With KKR's support, it is expected that further enhancement in the spread business should materialize into earnings along with the ability to grow their reinsurance business.

Current earnings have been impacted by significant statutory strain stemming from increased annuity business. The front loaded cost structure has created negative pre-tax operating losses for the line as well as for the whole. As such, associated statutory return metrics have fallen below peer benchmarks. Adjusted GAAP results are more stable when accounting for AOCI and other items.

Business Profile

Global Atlantic Financial Group is the marketing name for the insurance subsidiaries of Global Atlantic Financial Group LLC, which include Commonwealth Annuity and Life Insurance Company (Commonwealth), its subsidiaries First Allmerica Financial Life Insurance Company (First Allmerica), Forethought Life Insurance Company (Forethought), Accordia Life and Annuity Company (Accordia), and its

Business Profile (Continued...)

Bermuda-based affiliates Global Atlantic Re Limited (GA Re), and Global Atlantic Assurance Limited (GAAL). As of January 2, 2024, KKR & Co. own 100% of the Global Atlantic Financial Group LLC and the operating insurance subsidiaries.

AM Best notes that Accordia owns several captive reinsurers to support XXX/AXXX redundant reserves; however, these captives were established by the former parent and no new business is ceded from Global Atlantic. The company writes business through its US operations and subsequently cedes the majority of liabilities to its offshore entities, GA Re and GAAL, as part of the organization's overall corporate strategy.

Global Atlantic segments their operations into individual and institutional markets. Global Atlantic has focused their individual markets segment on the annuity and pre-need life markets, both of which the group has a significant presence. The company de-emphasized sales of variable annuities and focuses on fixed annuities and fixed indexed annuities; consistently maintaining a Top 5 market position in sales of fixed and fixed indexed annuities. Global Atlantic's retail life business focuses primarily on pre-need life. Global Atlantic entered the pre-need life market thought its acquisition of Forethought, leveraging Forethought's capabilities and distribution through funeral homes to consistently maintain a top market position. The company is also a leading player in the life and annuity reinsurance market. The group's institutional markets focus on block deals, flow treaties, and pension risk transfers.

AM Best views Global Atlantic's profile as moderately diversified due to multiple distribution channels utilized across its annuity and life segments; however, the liability profile is heavily concentrated in interest-sensitive reserves due to the scale of the annuity business relative to the life segments.

Enterprise Risk Management

Global Atlantic employs a comprehensive and integrated enterprise risk management strategy to support its elevated risk profile, benefiting from the strong risk management capabilities originally sourced from the group's former ultimate parent, Goldman Sachs, and continued with the new parent company KKR & Co. The company's risk management framework is overseen by a Risk Committee of the Board and led by the chief risk officer and focuses on three key risk areas: Assets, Liabilities, and Non-financial risks. Risk management issues are clearly defined by key risks areas, quantitative tolerances, and management accountability. Additionally, the

Enterprise Risk Management (Continued...)

company has continued to enhance its analytical capabilities through enhancements to its analytics and risk modeling programs, expanding stress and scenario testing, and integrating non-financial risks.

AM Best notes that Global Atlantic's maintains an elevated risk profile due to the complexity and transactional nature of its business strategy. The utilization of offshore reinsurance as part of its corporate strategy exposes the company to increased regulatory risk. The company's weighting to esoteric asset classes in the investment portfolio requires additional levels of expertise, analysis, and stress testing beyond those of more traditional corporate bond portfolios. Additionally, the group's exposure to interest sensitive reserves as well as equity market exposure on the guaranteed benefits riders require the company perform comprehensive analysis on its hedging program and asset liability matching programs.

Reinsurance Summary

The group generally sources business from highly rated counter parties and cedes business to highly rated counter parties or unrated affiliates.

Environmental, Social & Governance

AM Best believe that there is low risk to ESG factors at this time and has limited exposure to ESG factors. Credit quality, investment risk, and underwriting activities are also viewed as having limited ESG risk.

A Best's Financial Strength Rating opinion addresses the relative ability of an insurer to meet its ongoing insurance obligations. The ratings are not assigned to specific insurance policies or contracts and do not address any other risk, including, but not limited to, an insurer's claims-payment policies or procedures; the ability of the insurer to dispute or deny claims payment on grounds of misrepresentation or fraud; or any specific liability contractually borne by the policy or contract holder. A Financial Strength Rating is not a recommendation to purchase, hold or terminate any insurance policy, contract or any other financial obligation issued by an insurer, nor does it address the suitability of any particular policy or contract for a specific purpose or purchaser.

A Best's Issue/Issuer Credit Rating is an opinion regarding the relative future credit risk of an entity, a credit commitment or a debt or debt-like security.

Credit risk is the risk that an entity may not meet its contractual, financial obligations as they come due. These credit ratings do not address any other risk, including but not limited to liquidity risk, market value risk or price volatility of rated securities. The rating is not a recommendation to buy, sell or hold any securities, insurance policies, contracts or any other financial obligations, nor does it address the suitability of any particular financial obligation for a specific purpose or purchaser.

In arriving at a rating decision, AM Best relies on third-party audited financial data and/or other information provided to it. While this information is believed to be reliable, AM Best does not independently verify the accuracy or reliability of the information. Any and all ratings, opinions and information contained herein are provided "as is," without any express or implied warranty.
