Rating Rationale

Balance Sheet Strength: **Very Strong**

- GPM Life Group maintains the strongest level of risk-adjusted capitalization as measured by Best's Capital Adequacy Ratio (BCAR).
- Risk profile of the group's investment portfolio is viewed as in line with peers, as the group's bond holdings are of strong credit quality and mortgage holdings are in good standing.
- Capital and surplus increase primarily caused by benefit and expense management.
- Appropriate use of reinsurance to alleviate some of the new sales strain and protect capital and surplus.

Operating Performance: **Marginal**

- GPM Life Group has reported positive operating results after several years of negative results caused by a material increase in new business premium as well as by heightened mortality experience.
- The group has corrected negative operating earnings in 2025 due to lower mortality and expense management from targeted production management, which have resulted in improved earnings.
- Premium intake continues to decline across individual business lines as part of production management. Premium is shifting more to the renewal side versus first year.
- Investment performance remains adequate and consistent. Invested asset base marginally increased in 2025.

Business Profile: **Neutral**

- Execution risk has increased as the group implements its strategic business plan to expand into new markets.
- Significant distribution concentration stems from the independent marketing organization (IMO) channel, which makes up the majority of production.
- The group's core lines of business are ordinary life products that are viewed as relatively lower risk.
- Solid geographic diversification with no single state representing greater than 10% of the group's direct premium income. Product concentration is adequate with offerings that include traditional, final expense, and Medicare supplement.

Enterprise Risk Management: **Appropriate**

- GPM Life Group continues to make enhancements to its overall risk framework as it works toward a more formalized process while aligning all traditional insurance and investment risks on an ongoing basis.
- The group has established and implemented comprehensive policies and procedures at both the corporate and business segment level to minimize the effects of potential market volatility.
- GPM Life Group focuses on relatively creditworthy lines of business and manages a fairly conservative investment portfolio. The group's risk profile is low to modest as a result.

Outlook

- The stable outlook reflects the expectation that GPM Life Group's balance sheet strength assessment will remain very strong over the intermediate term while strategic growth plans result in consistently positive operating earnings in the near term.

Rating Drivers

- A negative rating action could occur from failure of execution in the planned strategic objectives.
- A negative rating action could occur if there is a deterioration in balance sheet metrics.
- While unlikely, a positive rating action could occur if GPM Life Group's operating losses are reversed and result in a sustained trend of positive earnings.

Credit Analysis

Balance Sheet Strength

Capitalization

GPM Life Group reports risk-adjusted capitalization at the strongest level as measured by Best's Capital Adequacy Ratio (BCAR). As a mutual life insurance company, GPM's primary source of surplus accumulation is from its operating results and investment gains. Furthermore, the company maintains a solid liquidity position, as its capitalization position is not supported by borrowed funds, surplus notes or captive transactions. The company has a \$30 million line of credit available at the Federal Home Loan Bank which has not been utilized. GPM uses its membership with the FHLB as a liquidity backstop and maintains no operating leverage.

Capital and surplus at GPM Life Group had generally increased with the profitability of the group's operating companies, however over the past few years capital and surplus has declined. From 2019 through year-end 2022, capital and surplus had been pressured due to an increase in expenses, an increase in death benefits driven by the pandemic, and a decrease in bond acceleration fees from 2021 to 2022, as well as statutory strain from an increase in new business. For 2023 and 2024, surplus decline largely resulted from continued negative operating results stemming from an increase in annuity benefits payments and surrenders. For 2025, surplus reversed and saw a solid increase due to strategic underwriting decisions and continued investment returns. Despite the recent decline in capital and surplus, the group's risk-adjusted capitalization position remains at the strongest level as per AM Best's Capital Adequacy Ratios (BCAR) and the overall balance sheet strength continues to be very strong.

Capital growth may continue to be slow for GPM Life Group over the near term, as the group has worked through surplus strain while continuing to enhance the product suite which includes underwriting application and screening improvements. Strategic growth will be pursued and GPM's capital profile is well-positioned to support this growth, and the expectation is that its improved product design will result in better persistency, stronger profitability over time, and better surplus growth over the medium to longer term.

During 2021, GPM Life Group put into place a reinsurance treaty, ceding the remaining 20% of a block of in-force business that was previously being reinsured on an 80/20 basis. This resulted in an increase in capital of roughly \$8.6 million. Aside from the increase in capital resulting from this deal, AM Best gives GPM qualitative credit for enacting a mitigation strategy to combat falling absolute capital.

As of 2025, GPM maintains proper asset-liability matching and has passed all cash flow testing scenarios. Dividends are expected to remain stable for the coming years as growth remains a priority. The group has seen mortality experience return to normal levels, in addition, benefits and surrenders experience has also been reduced by targeted production management and more normal levels of claims. Annuities are no longer a focus with associated policies and liabilities/reserves continuing to decline. In 2024 death benefits increased on some older ages. This impacted associated reserves and had an overall immaterial impact on net income.

Asset Liability Management - Investments

GPM's investment portfolio focus continues to be long-term bonds and direct commercial mortgage loans. Investments are managed in house. The bond portfolio is allocated primarily to investment-grade holdings and the mortgage portfolio has performed well with minimal problems or delinquencies. The remainder of GPM's invested assets include contract loans, cash and short term securities in addition to modest amounts of preferred stock, common stock and real estate assets, including its home office properties. The

Balance Sheet Strength (Continued...)

investment strategy for GPM has not changed materially in recent years and is expected to remain relatively unchanged over the near to medium term. Investment policies mandate allocations to high quality securities with low credit risk.

The group's bond portfolio consists of primarily corporate issues, U.S. Government debt, special revenue and special assessment obligations, and public utility securities, all of which are well-diversified among different classes and sectors. The group maintains a very modest allocation to private placements which are diversified across industry sectors. GPM is currently investing in high grade corporate debt, with strict limitations on below investment grade purchases. This investment strategy attempts to maximize yield without trading off on quality or extending the duration of the portfolio. GPM plans to be selective in its new long-term bond purchases going forward with a focus on safety of principal.

Mortgage lending is focused on office warehouse/service center properties in well-established industrial parks, and the group focuses on opportunities where the loan to value is conservative. The favorable historical performance of the portfolio has been attributable to the lower-risk profile of small size loans and stringent underwriting practices. These factors help to partially mitigate A.M. Best's concerns regarding the sizable percentage of invested assets in this class relative to the company's total adjusted capital and surplus, and the high concentration of mortgages in the state of Texas, however this concentration is decreasing year over year. Additionally, Texas based loans are properly diversified across the state to minimize weather related risks.

Outside of the fixed income and commercial mortgage loan holdings, the group holds about 7% of invested assets in policy loans, about 7% in cash, and modest amounts of real estate and equities. The group is not anticipating any material changes in its investment allocations over the near to medium term.

Operating Performance

Net income for GPM Life Group has trended significantly lower since 2017, however 2023 through 2025 saw a significant improvement in results. The main drivers of this increase are lower expenses and commissions driven by production management on new business. Near to medium term earnings will continue to be challenged from surrender benefits and mortality but to a lesser extent. Ordinary life policies are front loaded meaning underwriting costs, commissions and reserves are all expensed through the income statement once policies are written. Earnings are expected to smooth over the longer term as these new life policies turn profitable. Mortality experience has fluctuated but has generally been decreasing over the last few years. Surrenders, while still historically high, have leveled off and are expected to remain stable or possibly decrease in coming years.

Ordinary life, including universal life, traditional whole life, Medicare supplement and final expense are the group's core insurance products. Issued annualized premium for individual life has fallen across all products as production is managed. GPM's term life segment remains vulnerable to thin profit margins and expenses related to increased focus on expanding its distribution network. In response, the company implemented cost control and revenue enhancement initiatives, as well as strategies to improve agent productivity and to conserve profitable business. The company also continues to improve its cost structure and has introduced new products and modified existing products to maintain its competitive position in its niche markets which includes quoting and limit modifications.

GPM de-emphasized annuity growth due to the prolonged low interest rate environment, and reported premium levels that have been slightly down. The de-emphasis on annuities is not reflected in the overall direct premium levels as the expansion of the life and health products is much larger.

Business Profile

Government Personnel Mutual Life Insurance Company (GPM) is a Texas domiciled mutual life insurance organization that markets to government personnel and federal civil service markets as well as to the general civilian market. Life insurance plans are available to U.S. military personnel and to U.S. federal civil service employees through a federal allotment plan. GPM also offers a Medicare supplement product, which continues to grow in its significance to the group's overall business profile. A.M. Best believes the company has a competitive advantage in its well-defined niches related to its established infrastructure for federal allotment plan processing as well as proprietary systems in place. Automatic payment plans are available to the civilian population. The company entered the senior market in 2003 where it offers simplified issue and graded death benefit products primarily through independent agents and independent marketing organizations (IMOs).

GPM is licensed in 48 states and the District of Columbia, and benefits from decent geographic diversification as no single state accounts for more than 10% of GPM's total direct premium. Sales operations are conducted primarily on the personal producing general agents (PPGAs) and marketing general agent plans. GPM's distribution system utilizes a network of regional recruiters throughout the U.S. who recruit, train and supervise its PPGAs to market and distribute the company's insurance products to each of its core market niches. In recent years, the company has placed a greater emphasis on hiring additional regional recruiters for its civilian, military, civil service and senior niches. The IMO channel has seen improved diversification between partner firms.

GPM focuses on sales of individual life insurance products and offers final expense and a traditional individual product portfolio that includes whole life, individual universal life, and term life with guaranteed level premiums all without a war clause. The company also offers both deferred and immediate annuity products, although these lines of business have been de-emphasized since 2013. GPM has also focused on growing its Medicare Supplement line, this line had marginally fallen over the past four years on a direct and net basis but has continued to add strong complementary premium diversification to the group's total net premiums over the past few years. Overall, A.M. Best views the product portfolio of GPM Life as relatively low to moderate risk, with a focus on generally creditworthy life insurance products.

Enterprise Risk Management

GPM employs an enterprise risk management (ERM) strategy in line with the scope of its risks inherent in its balance sheet, operating performance and business profile, with many risk management tools integrated into its operations. This includes informal risk management tools and practices that establish clear accountability across the risk spectrum; top risk categories include strategic, operational, market, credit and underwriting risks. Additionally, GPM has focused on strengthening its cyber security recently with internal technological upgrades in addition to external data monitoring and cyber risk training of its employees. GPM is working to further enhance and formalize its existing risk management practices and procedures and has full buy in from its board of directors. As a medium sized life insurance company with select lines of business, management is involved in the daily operations and understands the risks they undertake. Additionally, the company's risk adjusted capitalization at the 99.8 VAR is well above the strongest level. A.M. Best views GPM's overall ERM assessment as appropriate given its risk profile at this time.

Reinsurance Summary

GPM utilizes a reinsurance relationship with Mutual of Omaha for its Medicare supplement line and cedes 90% of the risk on the product line to Mutual of Omaha.

GPM's primary reinsurer for new business is Swiss Re. New term business (except for the simple-to-issue, non-medical term product) is ceded on a coinsurance basis with 80% being ceded to Swiss Re subject to a maximum retention of \$125,000. A simple-to-issue term product is co-insured on a 25% basis with a maximum retention of \$125,000. Universal Life and Whole Life are ceded on a YRT basis to Swiss Re with a maximum retention of \$125,000, subject to a minimum cession of \$25,000.

In 2021, GPM ceded additional reinsurance on a block of term policies. This in-force business is now being 100% reinsured to Swiss Re as a mitigation effort to drive an increase in surplus.

A bulk Accidental Death Benefit agreement is in place with Swiss Re which cedes any one life in excess of \$25,000.

Environmental, Social & Governance

GPM has minimal ESG exposure and has drafted documented mitigation strategies to lessen the impact of events such as extreme weather, weather pattern changes and natural hazards, man-made disasters, and pandemics and disease outbreaks. GPM has also focused on sustainability efforts to reduce GPM's carbon footprint. Social criteria within GPM's ESG framework include equity and inclusion efforts, labor management and data privacy. On the product side, GPM is exposed to minimal ESG risk. In regards to investments, ESG has only small allocations to industries that could be considered medium to high risk in ESG screening. Building locations for diversification are considered for the CML portfolio.

A Best's Financial Strength Rating opinion addresses the relative ability of an insurer to meet its ongoing insurance obligations. The ratings are not assigned to specific insurance policies or contracts and do not address any other risk, including, but not limited to, an insurer's claims-payment policies or procedures; the ability of the insurer to dispute or deny claims payment on grounds of misrepresentation or fraud; or any specific liability contractually borne by the policy or contract holder. A Financial Strength Rating is not a recommendation to purchase, hold or terminate any insurance policy, contract or any other financial obligation issued by an insurer, nor does it address the suitability of any particular policy or contract for a specific purpose or purchaser.

A Best's Issue/Issuer Credit Rating is an opinion regarding the relative future credit risk of an entity, a credit commitment or a debt or debt-like security.

Credit risk is the risk that an entity may not meet its contractual, financial obligations as they come due. These credit ratings do not address any other risk, including but not limited to liquidity risk, market value risk or price volatility of rated securities. The rating is not a recommendation to buy, sell or hold any securities, insurance policies, contracts or any other financial obligations, nor does it address the suitability of any particular financial obligation for a specific purpose or purchaser.

In arriving at a rating decision, AM Best relies on third-party audited financial data and/or other information provided to it. You are solely responsible for seeking competent professional advice before making any investment, financial, tax or insurance decision. For additional details, refer to our *Terms of Use* available at the AM BEST website: <https://web.ambest.com/about/terms-of-use>. All information contained herein was obtained by AM BEST from sources believed by it to be accurate and reliable. Notwithstanding the foregoing, AM BEST does not make any representation or warranty, expressed or implied, as to the accuracy or completeness of the information contained herein, and all such information is provided on an "as is" and "as available" basis, without any warranties of any kind, either express or implied. Under no circumstances shall AM BEST have any liability to any person or entity for (a) any loss or damage of any kind, in whole or in part caused by, resulting from, or relating to, any error (negligent or otherwise) or other circumstance or contingency within or outside the control of AM BEST or any of its directors, officers, employees, or agents in connection with the procurement, collection, compilation, analysis, interpretation, communication, publication or delivery of any such information, or (b) any direct, indirect, special, consequential, compensatory, punitive or incidental damages whatsoever (including without limitation, personal injury, pain and suffering, emotional distress, loss of revenue, loss of present or prospective profits, loss of business or anticipated savings, or loss of goodwill) resulting from the use of, or inability to use, any such information, in each case, regardless of (i) whether AM BEST was advised in advance of the possibility of such damages, (ii) whether such damages were foreseeable, and (iii) the legal or equitable theory (contract, tort or otherwise) upon which the claim is based. The credit ratings, performance assessments, financial reporting analysis, projections, and any other observation, position or conclusion constituting part of the information contained herein are, and shall be construed solely as, statements of opinion and not statements of fact or recommendations to purchase, sell or hold any securities, insurance policies, contracts or any other financial obligations, nor do they individually or collectively address the suitability of any particular financial obligation for a specific purpose or purchaser. Credit risk is the risk that an entity may not meet its contractual, financial obligations as they come due. Service performance risk is the risk that an entity may not meet its contractual service performance obligations on behalf of its insurance partners. Consequently, neither credit ratings nor performance assessments address any other risk, including but not limited to, liquidity risk, market value risk or price volatility of rated securities. NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY SUCH RATING OR ASSESSMENT OR OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY AM BEST IN ANY FORM OR MANNER WHATSOEVER. Each credit rating, performance assessment or other opinion must be weighed solely as one factor in any investment or purchasing decision made by or on behalf of any user of the information contained herein. Each such user will, with due care, make its own study and evaluation of each security or other financial obligation, and of each issuer and guarantor of, and each provider of credit support, and an independent view of service provider performance for, each security or other financial obligation that it may consider purchasing, holding, or selling or for each service contract that it may consider entering into. For additional detail on credit ratings or performance assessments, and their respective scales, usage, and limitations, refer to the Guide to Best's Credit Ratings (<https://www.ambest.com/ratings/index.html>) or the Guide to Best's Performance Assessments (<https://www.ambest.com/ratings/assessmentMethodology.html>).
