Rating Rationale

Balance Sheet Strength: **Strongest**

- The risk-adjusted capitalization of Guarantee Trust Life Insurance Company (GTL) is assessed at the strongest level based on its Best's Capital Adequacy Ratio (BCAR) for its insurance and investment risks.
- Adequate liquidity ratios and positive operating cash flows.
- Maintains an average-risk investment portfolio managed by several asset management firms focused on their respective investment specialties.
- Enhanced financial flexibility via its membership since 2022 in the Federal Home Loan Bank of Chicago with access to funds for spread-based investing and liquidity (if needed).

Operating Performance: **Strong**

- GTL grew net premium moderately over the past five years at a 4.1% five-year compound annual growth rate at year-end 2024 due mainly to growth in its final expense product, along with continued growth in its hospital indemnity business.
- With the exception of 2023, GTL reported increasing pre-tax net operating gains annually in the prior four years. Operating gains continued to increase through year-end 2024 and through the second quarter of 2025 due mainly to higher net investment income.
- Reported strong return metrics with an average five-year return on equity (ROE) of approximately 14.1% and an approximate five-year return on revenue (ROR) of 8.1%. The ROE and ROR over the last five years have exceeded the benchmarks for health and life carriers with strong operating performance.
- While net investment income generally grew annually over the last five years due to the investment of positive cash inflows and reinvestment of matured securities, net investment yield remains below the benchmark for health and life carriers with strong operating performance due to its conservative investments.

Business Profile: **Limited**

- GTL is challenged by highly competitive senior supplemental health and life insurance markets.
- Although business is diversified across its product lines, more than one-third of net premium remains derived from hospital indemnity products.
- One of the leaders in the senior indemnity market, focused on filling gaps with niche indemnity products.

Enterprise Risk Management: **Appropriate**

- GTL maintains a formal enterprise risk management (ERM) program.
- An ERM Committee meets quarterly to discuss risk findings, implement controls and to identify emerging risks in the industry and any potential risks that may affect the organization.
- Employs cash flow testing, ALM risk/return management and other forecasting/planning and scenario analysis.
- Manages operational risks through a separate business continuity program.

Outlook

- The stable outlooks are based on the expectations that the company will continue to maintain its balance sheet strength metrics including its financial flexibility and capital growth, supported by the strongest level of BCAR as well as its strong operating performance.

Rating Drivers

- A trend of lower operating performance could result in a negative rating action.
- While unlikely, positive rating movement is possible if the organization is able to meaningfully diversify its cash flows, premium and earnings through additional growth and scale.

Credit Analysis

Balance Sheet Strength

Capitalization

The overall balance sheet strength assessment of Guarantee Trust Life Insurance Company (GTL) is assessed as strongest. Risk-adjusted capitalization is also assessed at the strongest level based on its Best's Capital Adequacy Ratio (BCAR) for its insurance and investment risks. Total capital has grown at a 14% compound annual growth rate over the last five years, far outpacing its 4.1% premium compound annual growth rate over the same period. Growth has been driven by robust net income generated by net investment income and organic growth in the company's profitable agency accident and health segment.

GTL's leverage metrics have remained sound in recent years. The ratio of net premium to capital and surplus was less than 2 to 1 at year-end 2024. The company's adjusted ratio of capital and surplus to liabilities was 30.2 times, while its 33.1% percent reinsurance leverage ratio is regarded as average.

GTL has reported increasing adequate liquidity levels in recent years, with 130.2% overall and 108.4% current liquidity ratios reported at year-end 2024. The company obtained access to a line of credit in 2022, which can be used for liquidity needs, if necessary. Additionally, it has consistently reported positive net operating cash flows annually.

Asset Liability Management - Investments

Several external asset management firms, based on their investment specialties, manage GTL's high quality, relatively conservative investments. Also, the company engages an outside investment consultant to enhance diversification, return and yield while maintaining prudent risk management. GTL has structured the portfolio to generate consistent cash flow with laddered maturities to provide liquidity, capital appreciation and capital preservation.

At year-end 2024, fixed income securities composed 84.4% of investments, with mortgage loans, cash & short-term investments, stock, Schedule BA Assets, real estate and policy loans composing the remainder. Fixed income securities, 93.3% investment grade, consist mostly of corporate issues well diversified among industry sectors and, to a lesser extent, US state/special revenue issues. Foreign and US government issues mainly compose the remainder. While the company's below investment grade holdings as a percentage of capital at year-end 2024 was on par with other life and health carriers, its level of higher risk but still investment grade NAIC Class 2 issues was favorably below the average for these carriers. One of the external asset management firms originates and manages the mortgage loans, and GTL invests in a portfolio of loans, which lowers default exposure.

Operating Performance

GTL's operating performance assessment is regarded as strong based on its generally favorable underwriting performance over the last five years and total operating performance metrics. The company has reported generally increasing pre-tax net operating gains during this period driven by investment income and profitability across its hospital indemnity and home health care & short term nursing segments. GTL reported an increase in pre-tax operating gain at year-end 2024 compared to prior year due to net underwriting gains. The company also reported higher pre-tax net operating gains through the second quarter of 2025 compared to the same period in the prior year due mainly to higher net investment income. In recent years, the company has reported robust return on equity and return on revenue metrics exceeding those of other health and life carriers with strong operating performance.

Most products have consistently reported operating gains during this period. GTL has reported operating gains in its closed, run-off long term care block over the last five years. The company has managed this business through rate increases and effective management of assets backing the reserves to yield solid investment returns. Individual life, however, has reported operating losses over the last four years mainly due to the strain from the underwriting costs and commissions associated with the growth in premium

Operating Performance (Continued...)

of its final expense life products. Also, the Special Markets small group medical stop-loss and senior dental products have reported operating losses in recent years due to intense competition and a lack of scale.

Except for 2022, net investment income has grown annually over the last five years from the investment of cash generated from operations and reinvestment of matured securities. Net Investment income increased through the second quarter of 2024 versus the same period in the prior year due to higher interest rate yields. However, investment yield has been below the average for other health and life carriers with strong operating performance due to its conservative investments.

GTL grew net premium moderately in recent years at a 4.1% five year compound annual growth rate as of year-end 2024 due mainly to growth in life premiums due to increases in the company's Heritage final expense product and growth in Accident & health premiums from increased hospital indemnity business. The company grew net premium through the mid-2025 vs the same period in the prior year due to the aforementioned reasons.

AM Best expects that GTL will continue to report favorable earnings, albeit slightly lower, in the future driven by new supplemental accident and health and life sales from new partnerships, resulting in strong operating performance. The company has assertively grown net premium through sales initiatives and introductions of new products and is constantly exploring new distribution opportunities. Greater premium, high persistency and a low loss ratio in its core hospital indemnity product, as well as prudent expense management via efficient use of technology, support GTL's continued growth in its core business lines.

Business Profile

The business profile assessment is viewed as limited. GTL, based in Glenview, IL, is a mutual health and life insurance company licensed in 49 states, the District of Columbia and Puerto Rico. Originally incorporated as an assessment life company, GTL was authorized in 1936 to issue assessment accident and health policies and, in 1962, converted to a mutual legal reserve company. GTL owns a minority interest in Independence Holding, Inc., a holding company which in turn owns United National Life Insurance Company of America, a supplemental health and life writer. GTL markets mostly moderate risk supplemental accident and health products and, to a much lesser extent, lower risk life products mainly to individuals.

GTL's operations are divided among its three segments-Agency Accident & Health, Individual Life and Special Health. Products include hospital indemnity, cancer, home health care and short-term nursing & home care, individual life (final expense, whole and term), accidental death and dismemberment, Medicare supplement, short-term disability and smaller amounts of dental and medical stop-loss. GTL is not directly exposed to the ACA, but several products were indirectly impacted by ACA mandates. While the company markets a diverse array of products, premium is somewhat concentrated as hospital indemnity products composed more than one-third of net premium at year-end 2024.

Business Profile (Continued...)

The Agency Accident and Health and Life segments, despite being challenged by highly competitive supplemental accident and health and life insurance markets, continue to solidly grow driven by moderate new and renewal sales of hospital indemnity, home health care and ST nursing & home care and final expense life products, and nominal growth in Special Risk and Special Markets. These products are marketed through brokers, sales organizations and other insurers' captive distributors. GTL launched its innovative "Precision Care" cancer product in early 2019, which provides coverage to assist in paying for cancer treatments and provides access to and pays for genomic sequencing tests and oncology consultations conducted by a leading non-profit medical research firm. In early 2020, the company introduced its new standalone combined dental, vision and hearing product called "DVH Complete". Agency Accident and Health and Life products launched over the remainder of 2020 included a short-term care product, the group version of the Precision Care cancer product and a final expense life product. The company launched a hospital indemnity product in late 2021. Products launched in 2022 included a new innovative short-term care product featuring caregiver benefits and support; a new critical illness product tailored to help fill the gaps in underage major medical insurance and a new hybrid life insurance product that combines whole life coverage with accelerated benefits for short-term care in a nursing facility or at home.

GTL has worked to implement a new life insurance strategy in recent years, allowing it to return to the life insurance marketplace through targeted distribution opportunities. The company launched a graded whole life product with a national leader in the senior life marketplace prior to 2022 and more recently launched a more traditional final expense product on an exclusive basis for a single distribution partner, ensuring a focused and controlled distribution approach. GTL expects to build a meaningful block of life business which will provide a significant source of profits separate from the individual accident & health business as the company desires to broaden the sources of its profitability and achieve greater diversity across its lines of business.

The highly competitive Special Health segment includes Special Risk college accident/sickness and sports, K-12 accident/sickness and sports, as well as non-student Special Market coverage consisting of small group medical stop-loss and senior dental. This segment consists of partnerships with third-party administrators. The company's Special Health segment partners with third party administrators and reinsurers acting as the fronting carrier, which allows GTL to enter niche markets.

GTL distributes its products through independent agents, general agencies, managing general agencies, dedicated career sales organizations and carriers that in-source GTL's supplemental products. These many and varied distribution relationships are a strategic competitive advantage.

AM Best acknowledges GTL's position as one of the market leaders in the senior indemnity space and its significant innovation initiatives. The company effectively leverages technology especially Artificial Intelligence, Cloud Computing and Big Data, and has built its competencies in technology to deliver channel interactions within target specific niche markets in several product lines. This investment in technology allows its products to efficiently enter the market at greater speed. GTL was the first insurer to offer electronic application submission on I-Pads and subsequently all other mobile devices. The company is the only carrier in the senior indemnity market that employs "Straight Through Processing" (STP) technology for its hospital indemnity, short-term care and cancer policies, which has helped it to attract new distribution partners. GTL's flagship product, "Advantage Plus", was the first hospital indemnity product in the industry designed to help fill some gaps in Medicare Advantage plans. The company's "Precision Care" cancer product was the first supplemental insurance policy to give policyholders coverage and access for genomic sequencing testing. In late 2024, the company introduced "Project 12"- an instantly issued final expense product that leverages an advanced, dat-driven application process, underscoring the company's premium diversification and ongoing innovation.

Enterprise Risk Management

AM Best assesses GTL's enterprise risk management (ERM) program as appropriate. The company's ERM and business continuity processes follow a classic three lines of defense framework. At the top of GTL's ERM oversight is its Chief Risk Officer (CRO) and ERM team, consisting of the President, Chief Operating Officer, Senior Vice President of Finance, Vice President of ERM, Manager of ERM and Chief Actuary. These officers meet regularly to review the issues and challenges which they have identified as risks to their business and continue to work on quantitative and qualitative monitoring of those risks through various measures.

Key objectives include the review of key risks, operational reviews, corporate policy and procedure reviews and capital reviews. The Manager of ERM position was created in 2011 to augment and further develop the group's risk management functions. This position reports to the CRO, and the CRO reports to the Senior Vice President of Finance. The risk management team actively reviews the ERM framework to place its risk management processes in with corporate strategy and business objectives for effective decision making.

The Chief Actuary and his team monitor risks associated with GTL's products, including claims experience, reserve requirements, underwriting, interest rate changes and sales forecasts. Operating risks are monitored and strategies revised as risks emerge. All products go through their modeling engine routinely performed by the actuarial team. Future cash flow, income statements and balance sheets are modeled using best estimated assumptions. This integrated system and its results are used in cash flow testing, ALM risk/return management and other forecasting/ planning and scenario analysis. The company uses a corporate risk matrix table to measure this progress and make strategic business decisions.

GTL has a business continuity planning team, as business continuity is a key risk. Their approach to business continuity is comprehensive and all measures in creating a seamless response are considered. Cyber security, data back-up and disaster recovery are operationally factored into its risk management program.

Reinsurance Summary

GTL cedes long-term care policies issued between January 1, 2007 and September 30, 2009 to Munich American Re. via a 50% co-insurance agreement. The company cedes 50% of new Medicare supplement business to General Re Life Corporation. Maximum net retention is \$100,000 for both individual and group life contracts. In 2022 the maximum net retention on some products was increased to \$200,000. This reinsurance is placed with several reinsurers through coinsurance agreements, with no significant exposure to a single reinsurer. Main reinsurers include General Re Life Corporation, Hannover Reinsurance, PartnerRe, PAVONIA Life Insurance Company of Michigan and Sagor.

Environmental, Social & Governance

AM Best considers GTL's exposure to material environmental, social and governance (ESG) risks to be low. The company's investment portfolio may contain some exposure to assets and industries considered higher risk.

A Best's Financial Strength Rating opinion addresses the relative ability of an insurer to meet its ongoing insurance obligations. The ratings are not assigned to specific insurance policies or contracts and do not address any other risk, including, but not limited to, an insurer's claims-payment policies or procedures; the ability of the insurer to dispute or deny claims payment on grounds of misrepresentation or fraud; or any specific liability contractually borne by the policy or contract holder. A Financial Strength Rating is not a recommendation to purchase, hold or terminate any insurance policy, contract or any other financial obligation issued by an insurer, nor does it address the suitability of any particular policy or contract for a specific purpose or purchaser.

A Best's Issue/Issuer Credit Rating is an opinion regarding the relative future credit risk of an entity, a credit commitment or a debt or debt-like security.

Credit risk is the risk that an entity may not meet its contractual, financial obligations as they come due. These credit ratings do not address any other risk, including but not limited to liquidity risk, market value risk or price volatility of rated securities. The rating is not a recommendation to buy, sell or hold any securities, insurance policies, contracts or any other financial obligations, nor does it address the suitability of any particular financial obligation for a specific purpose or purchaser.

In arriving at a rating decision, AM Best relies on third-party audited financial data and/or other information provided to it. While this information is believed to be reliable, AM Best does not independently verify the accuracy or reliability of the information. You are solely responsible for seeking competent professional advice before making any investment, financial, tax or insurance decision. For additional details, refer to our *Terms of Use* available at the AM BEST website: <https://web.ambest.com/about/terms-of-use>. All information contained herein was obtained by AM BEST from sources believed by it to be accurate and reliable. Notwithstanding the foregoing, AM BEST does not make any representation or warranty, expressed or implied, as to the accuracy or completeness of the information contained herein, and all such information is provided on an "as is" and "as available" basis, without any warranties of any kind, either express or implied. Under no circumstances shall AM BEST have any liability to any person or entity for (a) any loss or damage of any kind, in whole or in part caused by, resulting from, or relating to, any error (negligent or otherwise) or other circumstance or contingency within or outside the control of AM BEST or any of its directors, officers, employees, or agents in connection with the procurement, collection, compilation, analysis, interpretation, communication, publication or delivery of any such information, or (b) any direct, indirect, special, consequential, compensatory, punitive or incidental damages whatsoever (including without limitation, personal injury, pain and suffering, emotional distress, loss of revenue, loss of present or prospective profits, loss of business or anticipated savings, or loss of goodwill) resulting from the use of, or inability to use, any such information, in each case, regardless of (i) whether AM BEST was advised in advance of the possibility of such damages, (ii) whether such damages were foreseeable, and (iii) the legal or equitable theory (contract, tort or otherwise) upon which the claim is based. The credit ratings, performance assessments, financial reporting analysis, projections, and any other observation, position or conclusion constituting part of the information contained herein are, and shall be construed solely as, statements of opinion and not statements of fact or recommendations to purchase, sell or hold any securities, insurance policies, contracts or any other financial obligations, nor do they individually or collectively address the suitability of any particular financial obligation for a specific purpose or purchaser. Credit risk is the risk that an entity may not meet its contractual, financial obligations as they come due. Service performance risk is the risk that an entity may not meet its contractual service performance obligations on behalf of its insurance partners. Consequently, neither credit ratings nor performance assessments address any other risk, including but not limited to, liquidity risk, market value risk or price volatility of rated securities. NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY SUCH RATING OR ASSESSMENT OR OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY AM BEST IN ANY FORM OR MANNER WHATSOEVER. Each credit rating, performance assessment or other opinion must be weighed solely as one factor in any investment or purchasing decision made by or on behalf of any user of the information contained herein. Each such user will, with due care, make its own study and evaluation of each security or other financial obligation, and of each issuer and guarantor of, and each provider of credit support, and an independent view of service provider performance for, each security or other financial obligation that it may consider purchasing, holding, or selling or for each service contract that it may consider entering into. For additional detail on credit ratings or performance assessments, and their respective scales, usage, and limitations, refer to the Guide to Best's Credit Ratings (<https://www.ambest.com/ratings/index.html>) or the Guide to Best's Performance Assessments (<https://www.ambest.com/ratings/assessmentMethodology.html>).
