Rating Rationale

Balance Sheet Strength: **Very Strong**

- Mutual of Omaha Group maintains the strongest level of risk-adjusted capitalization as measured by Best's Capital Adequacy Ratio (BCAR) at the 99.6% VaR.
- Mutual of Omaha Group has generated favorable capital and surplus growth over the past four years and through 2025 as a result of accumulation of net income in select years.
- Mutual of Omaha Group consistently reports positive liquidity metrics and has additional flexibility to support potential liquidity needs with borrowing capacity from the Federal Home Loan Bank.
- While Mutual of Omaha Group's operating leverage is primarily due to its funding agreement-backed note program, the overall metrics remain within AM Best's guidelines. Furthermore, the group's financial leverage remains adequate.
- The group maintains a highly diversified investment portfolio with good credit quality. In addition, the group benefits from a solid liquidity position supported by liquid investment holdings.

Operating Performance: **Strong**

- Mutual of Omaha Group's premium growth continued to be robust with strong compound annual growth rates through 2025.
- Earnings remain well diversified across all business segments. The company has experienced improving trends in both earnings and return metrics the past three years.
- The group continues to benefit from strong net investment income, ranging from \$1.3 billion to nearly \$2 billion over the most recent five-year period and through 2025.

Business Profile: **Favorable**

- Mutual of Omaha Group is a large, diversified and established insurer with strong brand recognition operating nationally for more than 117 years. Further, Mutual of Omaha Group has a leading market position in Medicare supplement and simplified issue life insurance and a top ten overall position in the life, group disability and voluntary product segments, as well as favorable growth in retirement services.
- Mutual of Omaha Group offers a well-diversified product portfolio with a customer-focused strategy. The strategic business units include workplace solutions, financial solutions and retail solutions.
- The core Senior Health segment, part of the organization's retail solutions, utilizes independent and captive agents as well as a direct-to-consumer distribution strategy. The other segments and business units offer products through multiple channels lending to the overall diversification of the organization.
- Mutual of Omaha Mortgage remains as a top lender in reverse mortgages and a well-recognized lender in the traditional mortgage business.

Enterprise Risk Management: **Appropriate**

- Mutual of Omaha Group has a formal enterprise risk management (ERM) program with an established oversight and governance structure as well as processes to identify risk, identify or establish risk mitigation, and produce risk reporting. Governance includes oversight from the board of directors, management and other personnel.
- A top-down and bottom-up approach is used to evaluate the risks that confront the group.
- Mutual of Omaha Group's risk appetite and tolerance statements are well developed and affirmed annually and considered in business and strategy planning and day-to-day operations.
- The group developed and uses a risk-adjusted value capital framework based on the enterprise value of statutory distributable earnings, and it is used for calculating risk capital. The model is also used to make business decisions.

Outlook

- The stable outlooks reflect Mutual of Omaha Group's very strong balance sheet strength assessment, supported by its strongest level of risk-adjusted capitalization as measured by BCAR, strong operating performance and favorable business profile with a leading market position across a number of products.

Rating Drivers

- A negative rating action may occur if the group is unable to sustain improving operating performance in support of the strong overall operating performance assessment.
- A negative rating action may occur if there is a deterioration in balance sheet metrics.
- While unlikely, positive rating action could occur if there is a material and sustained improvement in balance sheet metrics.

Credit Analysis

Balance Sheet Strength

Mutual of Omaha's balance sheet strength is assessed as very strong. The stochastic BCAR score at the 99.6% VaR remained at the strongest level. The capital and surplus position has consistently grown over the most recent couple of years and through 2025. The continued growth has been the result of net income. The increase in risk based capital levels resulted from improvement in the capital level and remained within its target measurement. In addition, reinsurance was also part of the capital risk reduction for the organization. Mutual of Omaha Group's capital has benefited from regulation AXXX and XXX reserve transfers in United of Omaha to fund reserve redundancies. Omaha Reinsurance Company is the captive reinsurance entity and subsidiary of United of Omaha. Omaha Reinsurance Company, has an excess of loss reinsurance agreement with a third party, Canada Life, through September 30, 2042. As part of the overall balance sheet review, financial and operating leverage, and coverage metrics were considered. Unadjusted financial leverage was 22.6%, at year-end 2025 with adjusted financial leverage, including equity credit for the surplus notes was less than 10%. Interest coverage was considered strong at 10 times. Financial leverage included surplus notes and Federal Home Loan Bank (FHLB) borrowings. Operating leverage has been steadily increasing over the past few years due to the company's Funding Agreement Backed Notes program. Operating leverage metrics are expected to remain within AM Best's guidelines.

Capitalization

Mutual of Omaha has maintained the strongest level of risk-adjusted capitalization of 29.1% at the 99.6% VaR level, as measured by Best's Capital Adequacy Ratio (BCAR). During 2025, the group reported solid capital growth on both a consolidated and individual company basis relative to its business, interest rate and investment risks. In addition, absolute capital increased relative to year-end balance. The capital position was impacted by a net income and offset by a change in non-admitted assets. However, the BCAR is projected to remain at the strongest level. Mutual of Omaha's financial and operating leverage remain moderate for its rating level. Capital and surplus has benefited from opportunistic surplus notes issuance years ago and again in 2026. The organization maintains solid liquidity resources through committed lines of credit, access to FHLB facilities, security lending and guaranteed investment certificates (GICs).

Asset Liability Management - Investments

The investments are managed on a consolidated basis with the overall objective of managing credit risk, interest rate risk and liquidity risk while maximizing investment yields. The current strategy is growing the portfolio in new asset classes beyond core fixed income. Management has a continued focus on diversity and flexibility to navigate through the changing environment. The investment portfolio is well diversified, consisting primarily of exposure to public and private investment grade securities and high-quality commercial mortgages. Invested assets totaled over \$49 billion through 2025. The 2025 portfolio consisted primarily of fixed income investments

Balance Sheet Strength (Continued...)

which comprised of nearly three quarters of total invested assets, with the remainder invested in mortgages, common stock, cash and short-term investments and Schedule BA assets. The group has a small percentage of invested assets in real estate and contract loans. The distribution of assets has changed minimally over the year. Within the fixed income allocation, the largest portion of the general account portfolio is invested in investment grade bonds. Mutual of Omaha has historically maintained a sizable allocation to structured products, consisting principally of residential mortgage-backed securities (RMBS) and commercial mortgage-backed securities (CMBS), primarily agency-backed, collateralized mortgage obligations (CMOs) and other asset-backed securities (ABS).

Mutual of Omaha's bond portfolio is reasonably well diversified; however, private placements (including 144a securities) are generally less liquid than public bonds. The NAIC Class 2 bonds represented slightly above 40% of the bond portfolio and has fluctuated near this level over the past five years. Mutual of Omaha's commercial mortgage loan portfolio provides a high-quality alternative to direct corporate credit while enhancing income in the portfolio. The mortgage loan portfolio consists of first lien loans on commercial properties, limits the loan size and amount per borrower and diversified geographic locations and property types. The organization has strong risk management and asset liability management practices, monitoring its asset and liability duration's at the product level, company level and in the aggregate with low tolerance for duration mismatch. The group has utilized derivatives to hedge equity and foreign currency risk.

Operating Performance

Mutual of Omaha's operating performance is assessed as strong. The group has experienced improving trends in both earnings and return metrics in the past few years, as well as steady premium growth. Furthermore, overall earnings have been improving despite the impact of strain from new sales. The organization's earnings are well-diversified across all business segments with no reliance on any one segment or line of business.

The group reported solid operating earnings through 2025 which were driven mainly by improved mortality and investment income. This trend is expected to continue for the full year 2026.

The organization maintains a diversified product portfolio which has provided strong earnings diversification. Mutual of Omaha has a favorable balance between interest sensitive and non-interest sensitive product lines and newer products retain less interest rate risk. Additionally, there remains a favorable balance between offsetting mortality and longevity risk with low correlation morbidity risk. Furthermore, the organization holds a favorable mix of annually renewable, guaranteed renewable and non-cancelable risks.

However, the volatility in underwriting and increase in underwriting losses were primarily driven by higher mortality claims, as well as adverse claims experience in Medicare supplement combined with statutory strain from commissions.

The organization has exhibited strong growth in net premiums written (NPW) with a five-year compounded annual growth rate for premiums of more than 8% through 2025 across majority of the product lines. This favorable revenue growth is reflective of Mutual of Omaha's well diversified portfolio of products. In addition, sales were strong in several core product lines with favorable impact to NPW through 2025.

Mutual of Omaha Group reported overall favorable sales growth across nearly all business units. All business units except Income & Wealth Planning Annuities (individual annuities) reported year over year sales and revenues growth through 2025. Workplace Solutions is expected to be the leading contributor to overall revenue growth in the next few years as sales continues to be strong. Furthermore, Senior Health, which includes the group's Medicare supplement products reported consistent growth through 2025. Senior Health is experiencing competitive pressures on the Medicare supplement business. The individual business as well as group business is projected to grow in revenue volume.

Business Profile

Mutual of Omaha's business profile is assessed favorable, supported by its well-diversified product portfolio and strong brand name recognition. The company is a leading writer of Medicare Supplement and has a top 10 market position in a number of products including group benefits, pension risk transfer under \$50 million segment, indexed universal life, traditional life and reverse mortgage lender. In addition, while Medicare Supplement remains Mutual of Omaha's largest product as a share of revenue, the percentage of revenue has been declining as the company grows other product lines.

The Mutual of Omaha group of companies includes United of Omaha Life Insurance Company (United of Omaha), Mutual of Omaha's primary insurance subsidiary and the parent of United World Life Insurance Company (United World), and Companion Life Insurance Company (Companion Life). Mutual of Omaha is well diversified geographically, and enjoys a very strong brand-name recognition in its middle income and senior age market focus which complements its core product lines. The company is well known for its branding ties to the familiar Mutual of Omaha's Wild Kingdom which began in 1963. The group operates in all 50 states, the District of Columbia, Guam, Puerto Rico and the U.S. Virgin Islands. In addition, a diversified profile of product lines are offered including Medicare supplement, life insurance, annuity, retirement, institutional, long-term care and supplemental health products. The company is well recognized in the insurance and retirement markets, with leading market positions in Medicare supplement and a top ten position in the group disability and voluntary product segments, as well as favorable growth in retirement services. Mutual of Omaha has been in operation for over 117 years.

United of Omaha markets Medicare supplement (however, cedes 100% of new business issued to Mutual of Omaha Insurance Company), long-term care insurance, institutional investment products, including Guaranteed Interest Contracts (GICs), Federal Home Loan Bank (FHLB) funding agreements, fixed annuities (primarily SPIA and SPDA), whole life, term life and universal life products. United World acts as a marketing arm within Mutual of Omaha, but has historically accounted for a relatively small portion of the group's overall revenues. United World markets Medicare supplement and cedes 100% to Mutual of Omaha. Companion Life markets group life and health products to the New York market. Mutual of Omaha, the legal entity, is focused on health-related products, including Medicare supplement, long-term care, critical illness, and disability insurance. In addition, the consolidated operations also include a small number of non-insurance subsidiaries and mortgage operations.

Mutual of Omaha's Medicare Part D Plans were withdrawn from the market in 2025 due to the impact of the inflation reduction act and their lack of scale.

Business Profile (Continued...)

On April 1, 2026, the organization converted to a mutual holding company structure with the formation of Mutual of Omaha Holding Company. The new holding company structure can provide the organization with additional financial flexibility and the potential to issue debt instruments via capital markets.

As part of a customer focused strategy, the company offers financial products and services principally through its strategic business units: Workplace Solutions, Retail Solutions and Financial Solutions. In addition to these segments, is the Mutual of Omaha Mortgage subsidiary. The diverse business units and strong overarching distribution channels allow for numerous customer access points.

Workplace Solutions includes group life, short-term & long-term Disability, vision & dental, critical illness, hospital indemnity, Family Paid Medical Leave (FPML) and employee assistance. This segment specializes in multi-line, packaged sales to employer groups between 10 and 1,000 employees sold through an internal distribution force. Family Paid Medical Leave (FPML) continues to expand to additional states and could pose a threat to short-term disability products as employers could replace it with FPML. Mutual of Omaha recently launched a similar FPML product in a number of states. Core distribution is through brokers.

Retail Solutions includes senior health, life insurance as well as health and annuities. The Senior Health segment is focused on healthcare needs of consumers age 65 through a multi-channel approach, primarily through brokerage channels. Medicare supplement is the main product offered through this business unit as well as senior dental, vision and hospital indemnity. These are sold through brokers, captive agents and direct to consumers.

Life Insurance offers indexed universal life, term life and traditional small face whole life product, primarily a final expense product, with a focus on consumers who seek to ensure expenses at death are not a burden to their families. Targeted customers are 55 years of age or older and a household income of \$60,000 or less. This business unit employs multiple channels to distribute and market life insurance to targeted customer segments including core direct to customer, independent agents and financial advisors.

Health & Annuity includes life, health and annuity products marketed to consumers who are seeking to protect their income and pass wealth to their families. Other key products include includes long-term care, accidental death, individual fixed annuities, disability income and participant accident insurance. Due to profitability challenges on long-term care products, primarily pre-2004 block of business, improvements were made in the claims processes and the organization increased premium rates for new sales. With the challenges of long-term care insurance, the company has been working on de-risking the product. As part of this strategy, the organization has reduced benefit periods, implemented lower inflation periods and 90 day elimination periods, as well as utilizes reinsurance to actively manage exposure and timely rating actions. Core distribution is through the advisor network.

Financial Solutions includes institutional and mortgage. Institutional solution spans multiple markets and interacts with nearly every customer demographic. Institutional Solution is made up of several distinct segments, each with a unique strategy and focus on a specific market or customer: Institutional Annuity, Institutional Investments, 401(k), Special Risk, and Mortgage. Despite their uniqueness, each segment was selected strategically to provide a strong risk and return for the organization while capitalizing on synergies with other segments. With a clear right to win in each market, the products help the company diversify its earnings while enabling innovation and experimentation in non-core product lines. Institutional annuity segment accounts for two-thirds of the business.

Mutual of Omaha's mortgage operations are marketed as Mutual of Omaha Mortgage. It remains a strategic fit that aligns with its mission and customer focused strategy. The mortgage operations are located in 48 states and offer two product lines, traditional and reverse mortgage products. The traditional mortgage primarily operates as a direct to customer model, with leads generated from servicing portfolio for traditional and reverse originations and has the ability to sell to various investors. Reverse mortgage business has the largest distribution retail sales team in the industry. It owns Review Counsel, a leading reverse mortgage lead generator, and currently sells 100% of production to outside investors. Mutual of Omaha Mortgage is a top lender in reverse mortgages and a well recognized lender in the traditional mortgage business. Mutual of Omaha does not retain mortgages it writes. All mortgages written by Mutual of Omaha Mortgage are sold, with Mutual of Omaha Mortgage retaining servicing on a portion of mortgages it writes. In 2023, Mutual of Omaha Mortgage announced a strategic acquisition of the assets of Keller Mortgage, LLC, a member of the Keller Williams family of companies.

The corporate and other segment consists primarily of certain affiliate results, corporate investment income, and corporate expenses not allocated to the above strategic business units.

Enterprise Risk Management

The Enterprise Risk Management (ERM) program is assessed appropriate. Mutual of Omaha operates under an established formal ERM program which incorporates guidance from the COSO ERM Framework and utilizes the "Three Lines of Defense" model. The ERM program is overseen by the board of directors, management and other personnel and is utilized in setting strategy throughout the company. The company's ERM policy is reviewed and approved annually. The ERM program is designed to identify potential events that may affect the entity, assist the company in managing risk to remain within its risk appetite, and provide reasonable assurance regarding the achievement of entity objectives.

Risk culture and governance are important foundations in the ERM program and emphasize the company's core values, understanding of risk and the encouragement of desired behaviors. Oversight of the core principles begins with the board of directors. The board maintains its independence from the management of the company, and is thus able to provide objective input when necessary regarding business strategy, objectives and goals. The board fulfills its oversight role by reviewing and approving the organization's ERM policy annually, which dictates risk-related expectations and business partners' risk management responsibilities.

The Company has adopted Risk Appetite Statements (RAS) to guide it when deciding the types and amounts of risk that are acceptable. These RAS were developed in accordance with the company's RAS framework and are embedded in the company's ERM policy. The RAS framework also sets forth how each RAS exposure is measured, monitored and reported as well as the escalation protocol for the breach of a RAS.

In addition to the board of directors, the organization relies on the Enterprise Risk Management Committee (ERMC). The ERMC is charged with oversight of all enterprise wide key risks, including oversight of management led risk committees for financial risk, operational risk, emerging risk and compliance risk. Each risk committee identifies, assesses, and monitors risk exposure and develops key risk indicators (KRI). Annually, the ERMC reviews the RAS framework and the ERM framework and recommends the frameworks for approval by the board.

The Enterprise Risk Management Organization (ERMO) is headed by the Chief Risk Officer and includes a director of financial risk management, director of operational risk management, director of emerging risk management and a Chief Compliance and Ethics

Enterprise Risk Management (Continued...)

Officer. Financial risk management, operational risk management, emerging risk management each have subcategories of risk and all three areas have nine shared employees. In addition, the Chief Compliance and Ethics Officer has more than 50 employees covering subcategories of risk.

Quarterly, the ERMO creates an Enterprise Risk Report that is shared with the board of directors, the executive leadership team, and Risk Oversight Committees. The organization models interest rate, equity, and liquidity risk stress scenarios on a quarterly basis. The results are reported to the Financial Risk Oversight Committee through KRI's. As part of the Company's annual planning process, stress scenarios are developed and modeled to reflect the impact of risk realization on each of the company's primary financial reporting metrics.

Mutual of Omaha retired its economic capital (EC) model in 2022, which represented capital necessary to be 99.7% confident it will be economically solvent over the next year. The selection of a 99.7% confidence level was linked to the capital management to the company's stated risk appetite. However, the company introduced risk adjusted value (RAV) model in replacement of EC and considers RAV to align with its decision making and managing its statutory capital. There is an Internal reinsurance company, Omaha Reinsurance Company, which assumes XXX and AXXX premiums and reserves from United of Omaha.

The organization annually files its Own Risk and Solvency Assessment (ORSA) Summary Report with the state of Nebraska. The ORSA report demonstrates the utilization of an economic capital model as a key component of solvency and capital management practices including a prospective required capital assessment. In addition, there is a strong ongoing focus on cyber risk capabilities.

Mutual of Omaha responded swiftly to the pandemic and continues to provide innovative support to associates, business partners and customers. Initially, the organization successfully shifted all functions to remote work from home.

In 2022, Mutual of Omaha formalized a risk management practice statement and incorporation of ESG issues into the ERM framework. Additionally, the organization integrated the enterprise data governance program and business information management into the ERMO. Furthermore, the company created a structured approach among the groups to achieve common goals and objectives while providing value to the business.

Reinsurance Summary

The organization utilizes Omaha Reinsurance Company, a captive reinsurance entity and subsidiary of United of Omaha, which assumes AXXX and XXX premiums and reserves from United of Omaha. It is an onshore domestic captive with permitted accounting practices to support transfers. Omaha Reinsurance Company, has an excess of loss reinsurance agreement with a third party, Canada Life, through September 30, 2042.

The organization utilizes external reinsurers for its Long-Term Care (LTC) business. Legacy LTC policies, issued from 1997 through 2004, are reinsured with General Re. The amount of retention is based upon the age of the policyholder. Policies issued from 2011 on, including new policies, are reinsured to RGA on either a 15% or 50% coinsurance arrangement depending upon the year the policy was issued.

The organization has various other reinsurance agreements in place that serve a variety of functions. These functions include risk mitigation, enhanced returns, growth support, and support of organization strategy.

Environmental, Social & Governance

AM Best considers Mutual of Omaha's exposure to material environmental, social and governance (ESG) risks to be low. The organization continues to evolve its ESG efforts. The company operates in an environment where its underwriting activities have low or no exposure to climate risk, and its profile on both the underwriting and investment are not exposed to so-called toxic assets and industries. The company operates in line with market peers, and at present ESG factors are unlikely to impact the credit quality of the company over the short-term. There are no regulatory requirements relating to ESG, although the company regularly monitors developments to ensure its practices are compliant and has integrated ESG issues into the existing ERM framework.

Additional Rating Types

AM Best assigns Best's Issue Credit Ratings. Refer to the profile page to view current Issue Ratings for [Mutual of Omaha Ins Co \(AMB#007369\)](#)

A Best's Financial Strength Rating opinion addresses the relative ability of an insurer to meet its ongoing insurance obligations. The ratings are not assigned to specific insurance policies or contracts and do not address any other risk, including, but not limited to, an insurer's claims-payment policies or procedures; the ability of the insurer to dispute or deny claims payment on grounds of misrepresentation or fraud; or any specific liability contractually borne by the policy or contract holder. A Financial Strength Rating is not a recommendation to purchase, hold or terminate any insurance policy, contract or any other financial obligation issued by an insurer, nor does it address the suitability of any particular policy or contract for a specific purpose or purchaser.

A Best's Issue/Issuer Credit Rating is an opinion regarding the relative future credit risk of an entity, a credit commitment or a debt or debt-like security.

Credit risk is the risk that an entity may not meet its contractual, financial obligations as they come due. These credit ratings do not address any other risk, including but not limited to liquidity risk, market value risk or price volatility of rated securities. The rating is not a recommendation to buy, sell or hold any securities, insurance policies, contracts or any other financial obligations, nor does it address the suitability of any particular financial obligation for a specific purpose or purchaser.

All information contained herein was obtained by AM BEST from sources believed by it to be accurate and reliable. Notwithstanding the foregoing, AM BEST does not make any representation or warranty, expressed or implied, as to the accuracy or completeness of the information contained herein, and all such information is provided on an "as is" and "as available" basis, without any warranties of any kind, either express or implied. Under no circumstances shall AM BEST have any liability to any person or entity for (a) any loss or damage of any kind, in whole or in part caused by, resulting from, or relating to, any error (negligent or otherwise) or other circumstance or contingency within or outside the control of AM BEST or any of its directors, officers, employees, or agents in connection with the procurement, collection, compilation, analysis, interpretation, communication, publication or delivery of any such information, or (b) any direct, indirect, special, consequential, compensatory, punitive or incidental damages whatsoever (including without limitation, personal injury, pain and suffering, emotional distress, loss of revenue, loss of present or prospective profits, loss of business or anticipated savings, or loss of goodwill) resulting from the use of, or inability to use, any such information, in each case, regardless of (i) whether AM BEST was advised in advance of the possibility of such damages, (ii) whether such damages were foreseeable, and (iii) the legal or equitable theory (contract, tort or otherwise) upon which the claim is based. The credit ratings, performance assessments, financial reporting analysis, projections, and any other observation, position or conclusion constituting part of the information contained herein are, and shall be construed solely as, statements of opinion and not statements of fact or recommendations to purchase, sell or hold any securities, insurance policies, contracts or any other financial obligations, nor do they individually or collectively address the suitability of any particular financial obligation for a specific purpose or purchaser. Credit risk is the risk that an entity may not meet its contractual, financial obligations as they come due. Service performance risk is the risk that an entity may not meet its contractual service performance obligations on behalf of its insurance partners. Consequently, neither credit ratings nor performance assessments address any other risk, including but not limited to, liquidity risk, market value risk or price volatility of rated securities. NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY SUCH RATING OR ASSESSMENT OR OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY AM BEST IN ANY FORM OR MANNER WHATSOEVER. Each credit rating, performance assessment or other opinion must be weighed solely as one factor in any investment or purchasing decision made by or on behalf of any user of the information contained herein. Each such user will, with due care, make its own study and evaluation of each security or other financial obligation, and of each issuer and guarantor of, and each provider of credit support, and an independent view of service provider performance for, each security or other financial obligation that it may consider purchasing, holding, or selling or for each service contract that it may consider entering into. For additional detail on credit ratings or performance assessments, and their respective scales, usage, and limitations, refer to the Guide to Best's Credit Ratings (<https://www.ambest.com/ratings/index.html>) or the Guide to Best's Performance Assessments (<https://www.ambest.com/ratings/assessmentMethodology.html>).
