Under Review Rationale

The ratings of the members of A-CAP Group remain under review with negative implications based on a pending capital raise while also considering the uncertainty associated with the completion of the capital raise and execution risk of the transaction. The ratings will remain under review while AM Best assesses the development and impact of the pending capital raise on the group's rating fundamentals.

Rating Rationale

Balance Sheet Strength: **Adequate**

- The balance sheet assessment of A-CAP Group (ACAP) is impacted by consideration of a pending capital raise on the financial condition of the group. A-CAP faces an elevated risk profile driven by its elevated levels of reinsurance leverage, weak regulatory capital position and presence of illiquid assets.
- The group has assets that are not traditionally associated with insurance company investments, such as European football clubs and aviation. There is a duration mismatch with its liabilities, a concentration in individual securities, investments in affiliated assets and concentration in thinly traded Level 3 assets where quoted market prices are not generally available and the Company then uses third party valuations and alternative processes to calculate Fair Market Value for these assets.
- The group has concentrated reinsurance leverage even after recapturing the treaty with 777 Re in the first quarter of 2024. It utilizes a mix of rated and unrated unaffiliated reinsuring counterparties, both at the rated entities and at captives, as well as an unrated operating company. The risk of the unrated counterparties is mitigated using collateralized reinsurance agreements.
- Current regulatory capital ratios have deteriorated since 2023.

Operating Performance: **Adequate**

- ACAP has demonstrated an improvement in net operating earnings through year-end 2024, although there is a high reliance on revenue generation from ceding commissions. Operating earnings through the third quarter of 2025 are significantly behind the performance in 2024.
- Full year pre-tax operating gains have grown significantly over the past six years through year-end 2024, increasing from amounts consistently under \$10 million to amounts over \$30 million and then to over \$65 million in 2023 and 2024.
- Individual annuities had exhibited long-term growth through 2024, adding new business and competitive product offerings. Premiums had also experienced long-term growth through year-end 2024 in the group's annuity business while the group attempted to establish its share in the marketplace.
- Premiums, however, through 2025 are down significantly, impacted by the group's actions and regulatory actions.
- Elevated surrenders in the fourth quarter of 2024 and the first three quarters of 2025, as well as reduced premiums in the first three quarters of 2025, may pressure continued profitability.

Business Profile: **Limited**

- Recent regulatory and legal issues have damaged ACAP's reputation, calling into question ACAP's ability to place new business and retain existing business.
- ACAP experienced substantial increases to surrender benefits in the fourth quarter of 2024 and the first three quarters of 2025. Gross and net premiums are also down significantly after the group's actions and regulatory actions impacted new sales.
- The annuity market is a highly competitive market where ACAP brands compete with large national brands, and the group has a small market share in the multi-year guaranteed annuity (MYGA) space where it offers its flagship product.
- ACAP focuses on offering various fixed deferred annuities and an emphasis on MYGAs with limited product diversification. There are some pre-need, final expense life insurance and Medicare supplement offerings.

Enterprise Risk Management: **Marginal**

- Litigation, reputational risk and challenges regarding asset valuations indicate a weak application of the group's ERM program.
- ACAP has a developed risk management program, which consists of a team of key people from various functions and levels within the firm. There is a limited number of independent directors across the various operating companies, however.

- Corporate governance issues are overseen by the board of directors, its chief risk officer and its various committees on a quarterly basis; however, the controls of risk management of reinsurance exposure are in question.
- There are identified major risks, which have mitigating strategies built around them, and counterparty risk is one of them; however, the group continues to move new business into unrated counterparties.
- ACAP has a higher risk profile due to higher reinsurance leverage and its concentration in interest-sensitive liabilities compared to more diversified life insurance companies.

Rating Drivers

- A negative rating action could occur if the group fails to raise capital to sufficiently improve its balance sheet metrics.
- A negative rating action could occur if the group's operating performance were to deteriorate.
- A positive rating action could occur if AM Best's assessment of the business profile were to improve based on the group executing its strategy to stabilize its position in the market.

Credit Analysis

Balance Sheet Strength

A-CAP Group's balance sheet is assessed as Adequate, based on a pending capital raise and its impact on the financial condition of the company, despite a very weak risk adjusted capital, concerns regarding illiquid assets amid negative cash flow from operations, concentration of assets, and a concentrated reinsurance program.

A-CAP Group's long-term obligations consist of the payment of future claims, and to meet the requests of annuity owners who choose to withdraw their annuity funds rather than rolling over into a new guarantee period as well as surplus notes. Management has established external lines of credit as a precaution in the event that a short-term liquidity situation arises, and the holding company structure allows for capital to be deployed down to its operating companies in the group to support its growing business.

Capitalization

A-CAP Group's risk-adjusted capitalization is viewed negatively based on its low level of capitalization, holdings of illiquid assets, its concentration in a number of assets, an increase in Schedule BA holdings and its reinsurance leverage.

A-CAP Group's risk based capital is assessed as very weak as measured by Best's Capital Adequacy Ratio (BCAR), reinforced by the risk-based capital barely in excess of 300% authorized control level for both Atlantic Coast Life (ACL) and Sentinel Security Life (SSL). Each of these risk adjusted capital measures continue to reflect the impact of recapturing a significant block of business effective January 2024.

A-CAP Group's reinsurance agreements, especially on its fixed annuity businesses, mitigate insurance risk and interest rate risk. However, the Group bears the business risk charges on its direct business. Surplus notes as a percentage of capital have been declining over time and represent less than 10% of capital and surplus at year end 2024. There is leveraged reliance on utilization of offshore and unrated reinsurers, which results in outsized reinsurance counterparty credit risk, which is primarily mitigated through the use of collateralized reinsurance agreements. A consistent trend of operating earnings have contributed to the growth of capital over the past several years.

Asset Liability Management - Investments

A-CAP Group's fixed income portfolio consists of bonds centered in public corporates and private collateralized loan obligations. The amount of private holdings has increased ten-fold since 2014, and now makes up over 85% of the bond portfolio; meanwhile, public holdings have remained flat. Overall, bonds have tripled during the period. The bond portfolio continued to shift in 2024 toward NAIC class 2 (approx. 65%) and BIG (10%) from NAIC class 1 (approx. 23%)

The majority of the group's commercial real estate portfolio is comprised of multi-family property type with a mix of geographies. The mortgage loan portfolio is predominately commercial type where loan-to-values are approximately 60%. The mortgages not in good standing have moved from 0% as recently as 2022 to over 10% in the past 2 years.

Through 2024, the group's overall allocation has seen a shift from bonds and a trend of high allocation to cash and short-term securities to Schedule BA assets. At year-end 2024, BA Assets were 190% of capital, and high risk assets, defined primarily as BA Assets and NAIC Class 3 to 6 bonds are ranked at the 98th percentile relative to the individual annuity benchmark.

A-CAP Group has a small allocation to preferred and common stocks and does not have any material market valuation risk at this point in time.

Reserve Adequacy

The cash flow testing NY7 results are favorable for ACL and SSL. Further, the company runs in-house scenarios, which are also result in favorable outcomes.

Holding Company Assessment

The holding company is viewed as neutral, and has contributed capital into the operating entities each of the last 3 years to support its operations.

Financial Leverage Summary - Holding Company

Financial Leverage Ratio (%)	62.80
Adjusted Financial Leverage Ratio (%)	41.80
Interest Coverage (x)	1.50

Operating Performance

Prior to recent deterioration, A-CAP Group's trend of operating performance through year-end 2024 had been favorable, with net results having been driven by growing investment returns as well as strong levels of ceding commissions. Through 2024, premiums had shown significant growth in the annuity product line as A-CAP Group was establishing market share in the market place with competitive product offerings. AM Best considers A-CAP Group's quality of earnings to be low, however, as revenue generation was materially driven by ceding commissions, with tighter spreads for certain products.

Fixed annuity premiums, however, decreased substantially in the first 3 quarters of 2025, following steady growth from 2020 through 2024. Surrenders have remained elevated since the 4th quarter of 2024, but have shown a downward trend since its peak. Consequently, A-CAP Group's operating income through the third quarter of 2025 significantly lagged operating income in recent years.

Operating Performance (Continued...)

Strain in previous years was due to expenses associated with new business growth, increases in expenses associated primarily with state expansion initiatives, new product development, product redesign, agency expansion, technology enhancements and costs related to staffing increases as well as several "one-time" expenses as part of the realignment of the organization.

Business Profile

A-CAP Group's business profile is viewed by AM Best as limited. Recent disruptive events, such as regulatory orders (subsequently rescinded), have resulted in elevated levels of surrenders and precipitous declines in premium volume since late 2024 through the third quarter of 2025, and are viewed as a significant disadvantage for the group's product distribution relationships.

Atlantic Coast Life Insurance Company (ACL) and Sentinel Security Life Insurance Company (SSL) are collectively referred to as A-CAP Group. Advantage Capital Holdings, LLC (A-CAP) holds the majority ownership of all entities.

A-CAP Group's primary focus has shifted over the years to growth in the competitive fixed annuity space. The Group has also experienced premium growth in its final-expense and pre-need products.

ACL was purchased in June 2015 and operates as a multi-year guaranteed annuity (MYGA) and fixed index annuity (FIA) provider. ACL also markets a pre-need product, and in prior years offered other product lines that were subsequently de-emphasized as its fixed deferred annuity portfolio grew.

SSLIC was originally organized in 1948 as a final expense writer and was purchased in June, 2016. SSL's business profile had been concentrated in the final expense market, but shifted post-acquisition toward fixed annuities, with a focus on diversifying its earnings sources.

As part of A-CAP Group's growth initiatives, management's focus has been to consolidate operational efficiencies, improve product and distribution strategies, and raise capital as a means to accommodate growth initiatives. As part of its effort to gain efficiencies, the group utilizes services from other affiliated companies for certain asset management and administrative services, and reinsurance activities.

Enterprise Risk Management

A-CAP's ERM program is viewed unfavorably by AM Best. A-CAP Group has recently suffered reputational damage based on regulatory actions that have manifested as an increase in surrenders and decline in written premium. The Group has attempted to manage through its recent challenges through litigation.

Although A-CAP Group's management continues to enhance its Enterprise Risk Management (ERM) program, AM Best views the program and its execution as not exhibiting a risk averse culture.

The framework operates under a three lines of defense model; the line of business (LOB) identifies, measures, mitigates and reports risks as the first line of defense. The second line is comprised of a risk management team consisting of the Executive Risk Committee and Enterprise Risk Management Committee, and various members of senior management from the individual companies under the A-CAP Group. This layer provides oversight and advisory services to the lines of business. The Internal Audit function and peer review provide the third line of defense. This element of independence of program oversight is crucial to ensuring an environment of controls exists to carry out the mission of risk management.

Management has identified four main areas of focus that include market competition for product offering, investment portfolio, reinsurer capacity/performance and operating platform disruptions/threats. Recent developments have highlighted issues in these focus areas, particularly with the amount of recent litigation and reputational damage.

Management has attempted to lower the Group's exposure to unaffiliated equity investments, has expanded its product offerings, and has enhanced its reinsurance counterparty selection criteria. Corporate governance issues are overseen by the Board of Directors and its various committees on a quarterly basis. The Group has Breach Response coverage in place.

Enterprise Risk Management (Continued...)**Reinsurance Summary**

A-CAP's reinsurance program is viewed negatively, as the Group employs captives and an affiliated sidecar structure to retrocede a material amount of its annuity business to a limited number of reinsurers, dominated by offshore counterparties. The credit risk associated with reinsurance counterparties is materially mitigated for the organization with the use of collateralized reinsurance agreements. However, there are risks beyond the credit risk that are present in the reinsurance program related to concepts such as dependence on reinsurance for growth, dispute risk, and instability in the reinsurance market.

The ceded reinsurance agreements have provided the group with capacity to write increasing amounts of business while containing the impact of the strain on its capital, although AM Best considers risk-adjusted capital adequacy on both an individual statutory entity, as well as on a consolidated (inclusive of captives) basis. The group seeks additional reinsurance partners to facilitate reinsurance counterparty diversification and further strategic positioning.

Environmental, Social & Governance

The Group has a documented statement on ESG, as ESG issues are considered in its asset portfolio strategy.

A Best's Financial Strength Rating opinion addresses the relative ability of an insurer to meet its ongoing insurance obligations. The ratings are not assigned to specific insurance policies or contracts and do not address any other risk, including, but not limited to, an insurer's claims-payment policies or procedures; the ability of the insurer to dispute or deny claims payment on grounds of misrepresentation or fraud; or any specific liability contractually borne by the policy or contract holder. A Financial Strength Rating is not a recommendation to purchase, hold or terminate any insurance policy, contract or any other financial obligation issued by an insurer, nor does it address the suitability of any particular policy or contract for a specific purpose or purchaser.

A Best's Issue/Issuer Credit Rating is an opinion regarding the relative future credit risk of an entity, a credit commitment or a debt or debt-like security.

Credit risk is the risk that an entity may not meet its contractual, financial obligations as they come due. These credit ratings do not address any other risk, including but not limited to liquidity risk, market value risk or price volatility of rated securities. The rating is not a recommendation to buy, sell or hold any securities, insurance policies, contracts or any other financial obligations, nor does it address the suitability of any particular financial obligation for a specific purpose or purchaser.

In arriving at a rating decision, AM Best relies on third-party audited financial data and/or other information provided to it. While this information is believed to be reliable, AM Best does not independently verify the accuracy or reliability of the information. For additional details, refer to our *Terms of Use* available at the AM BEST website: <https://web.ambest.com/about/terms-of-use>. All information contained herein was obtained by AM BEST from sources believed by it to be accurate and reliable. Notwithstanding the foregoing, AM BEST does not make any representation or warranty, expressed or implied, as to the accuracy or completeness of the information contained herein, and all such information is provided on an "as is" and "as available" basis, without any warranties of any kind, either express or implied. Under no circumstances shall AM BEST have any liability to any person or entity for (a) any loss or damage of any kind, in whole or in part caused by, resulting from, or relating to, any error (negligent or otherwise) or other circumstance or contingency within or outside the control of AM BEST or any of its directors, officers, employees, or agents in connection with the procurement, collection, compilation, analysis, interpretation, communication, publication or delivery of any such information, or (b) any direct, indirect, special, consequential, compensatory, punitive or incidental damages whatsoever (including without limitation, personal injury, pain and suffering, emotional distress, loss of revenue, loss of present or prospective profits, loss of business or anticipated savings, or loss of goodwill) resulting from the use of, or inability to use, any such information, in each case, regardless of (i) whether AM BEST was advised in advance of the possibility of such damages, (ii) whether such damages were foreseeable, and (iii) the legal or equitable theory (contract, tort or otherwise) upon which the claim is based. The credit ratings, performance assessments, financial reporting analysis, projections, and any other observation, position or conclusion constituting part of the information contained herein are, and shall be construed solely as, statements of opinion and not statements of fact or recommendations to purchase, sell or hold any securities, insurance policies, contracts or any other financial obligations, nor do they individually or collectively address the suitability of any particular financial obligation for a specific purpose or purchaser. Credit risk is the risk that an entity may not meet its contractual, financial obligations as they come due. Service performance risk is the risk that an entity may not meet its contractual service performance obligations on behalf of its insurance partners. Consequently, neither credit ratings nor performance assessments address any other risk, including but not limited to, liquidity risk, market value risk or price volatility of rated securities. NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY SUCH RATING OR ASSESSMENT OR OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY AM BEST IN ANY FORM OR MANNER WHATSOEVER. Each credit rating, performance assessment or other opinion must be weighed solely as one factor in any investment or purchasing decision made by or on behalf of any user of the information contained herein. Each such user will, with due care, make its own study and evaluation of each security or other financial obligation, and of each issuer and guarantor of, and each provider of credit support, and an independent view of service provider performance for, each security or other financial obligation that it may consider purchasing, holding, or selling or for each service contract that it may consider entering into. For additional detail on credit ratings or performance assessments, and their respective scales, usage, and limitations, refer to the Guide to Best's Credit Ratings (<https://www.ambest.com/ratings/index.html>) or the Guide to Best's Performance Assessments (<https://www.ambest.com/ratings/assessmentMethodology.html>).
