Rating Unit - Members

Rating Unit: Americo Financial Life Group | **AMB #:** 069530

AMB # **Rating Unit Members**
006233 Americo Finl Life and Annuity

AMB # **Rating Unit Members**
006491 Great Southern Life Ins Co

Rating Rationale

Balance Sheet Strength: **Strongest**

- Strongest level of risk-adjusted capitalization, as measured by Best's Capital Adequacy Ratio (BCAR), supported by a high-quality investment portfolio that is well-matched against product liabilities with some allocation to private credit to enhance yield.
- Diversified liability profile includes both life insurance and annuity products.
- The group's liquidity has been resilient and adequate even in stressed scenarios, supported by access to the debt capital markets, bank debt, and membership with the Federal Home Loan Bank of Des Moines.
- Leverage and interest coverage ratios are within AM Best's tolerance for the current rating levels.
- Disciplined capital management through dividends or reinvestment of earnings.

Operating Performance: **Adequate**

- Robust levels of available capital have supported strong top-line organic growth in core direct insurance product sales.
- Growth is driven by individual life insurance and annuity sales and product innovation, and an inorganic acquisition in recent years.
- The group has some exposure to interest-sensitive business including a stable closed block of universal life insurance with relatively high minimum interest rate guarantees and some renewal premium; however, Americo Financial Life Group (Americo) has maintained competitive annuity crediting rates and net investment income.
- Net earnings on both a statutory and GAAP basis have exhibited volatility, partly due to new business acquisition cost strain, non-economic accounting impacts, and varying levels of net investment income.

Business Profile: **Neutral**

- Growing core market of smaller-face life insurance policies with a focus on technology-driven application and underwriting processes.
- Americo maintains strong market positions across its various core markets, supported by leading distribution capabilities, although the group operates in a highly competitive broader life insurance and annuity market.
- Product risk profile is less risky than some peers and Americo does not offer living benefits as part of its fixed indexed annuity products.
- Long-standing management team has a history of insurance industry solutions expertise and deep investment management experience.

Enterprise Risk Management: **Appropriate**

- Enterprise risk management (ERM) system encompasses all insurance entities under Americo Life Inc., and the group has a demonstrated ability to pivot its strategy in order to achieve its desired risk profile.
- Americo's formalized ERM plan includes centralized risk reporting, annual risk assessments, and quarterly meetings with the board and owners where new emerging risks are reviewed.
- The group performs cash flow testing beyond the New York 7 scenarios, which are used to analyze the reserves and help management identify, measure, and develop mitigation plans for certain risks such as shocks from higher mortality, policy lapse rates, or lower interest rates.
- Americo uses reinsurance strategically with generally highly rated counterparties to support sales growth and share risk.

Outlook

- The stable outlooks reflect the expectation that Americo will maintain its strongest level of risk-adjusted capitalization, as measured by BCAR, and that management's actions will continue to mitigate the impact of new business strain on risk-adjusted capitalization levels.

Rating Drivers

- A negative rating action could occur if the group's overall balance sheet strength metrics, including its risk-adjusted capitalization levels, were to decline.
- A negative rating action could occur if the group reports a sustained trend of operating losses.
- A positive rating action could occur if Americo reported a trend of profitable premium growth.

Credit Analysis

Balance Sheet Strength

Capitalization

Americo Financial Life and Annuity Insurance Company (AFL) (Dallas, Texas), and its sister company Great Southern Life Insurance Company (TX) are together referred to as Americo Financial Life Group (Americo). Americo maintains the strongest level of risk-adjusted capitalization as measured by Best's Capital Adequacy Ratio (BCAR).

On May 30, 2025, Ozark National Life Insurance Company (Ozark, TX) became a wholly owned subsidiary of AFL, which in turn, is indirectly wholly owned by Americo Life, Inc (ALI). This acquisition increased Americo's individual life insurance reserves in force by approximately 10%. Ozark's in-force life insurance and franchise value through its captive agent distribution model also provide Americo with a stable block of business and more diversified distribution.

Americo had \$7.9 billion of invested assets at the end of the third quarter of 2025. Assets and available capital have generally increased during the past five years due to profitable operations focused on the individual life insurance and annuity markets in the United States, as well as through explicit and implicit support from the intermediate parent company, ALI. The group has a well-diversified mix of business as measured by retained reserves or statutory earnings, which primarily includes a range of individual life insurance products and a suite of individual deferred annuity products including multi-year guaranteed annuities (MYGAs) and equity indexed annuities.

Partially offsetting these positive rating factors is some goodwill post the Ozark acquisition and incremental reinsurance leverage. However, Americo's strategic use of reinsurance is appropriate with various generally highly-rated counter-parties, and the group does not use captive reinsurers. The group uses internal surplus notes which does not detract from the group's overall quality of capital. Americo's interest-sensitive business includes some individual life insurance policies offering relatively high guaranteed minimum interest rates, as well as some annuity business; however, spread compression risk in a low interest rate environment is mitigated by a disciplined asset-liability management program that maintains duration gaps within tolerance by product.

Note that the figures in the data tables in this report for this lead rating unit, Americo Financial Life Group, are an aggregation of the statutory reported financials for AFL (AM Best # 6233), AFL's affiliate Great Southern Life Insurance Company (AM Best # 6491), and AFL's subsidiary Ozark National Life Insurance Company (AM Best # 6877). Great Southern Life Insurance Company is a Rating Unit Member of Americo Financial Life Group. In contrast, Ozark National Life Insurance Company (AM Best # 6877) was relatively recently acquired by AFL on May 30, 2025, and as such Ozark is not grouped into Americo Financial Life Group for ratings purposes. Ozark has a separate credit report and rating (see AM Best # 6877 for additional details). Because AFL acquired Ozark in 2025, the 2024 and prior figures in the data tables in this credit report include Ozark's reported historical financials, and as such are not consistent with the actual trend that Americo has previously reported before it acquired Ozark.

Asset Liability Management - Investments

The majority of Americo's invested assets are held in bonds, which include publicly-traded corporate sector high-quality securities. The allocation to private credit, primarily in more liquid Section 144A bonds, has gradually increased over time. Over 96% of bonds are investment grade, with the allocation to NAIC Class 2 securities being approximately 40%. Below investment grade exposure is a small percent of total bonds. Some bonds are affiliate investments, which in the BCAR are assessed a risk surcharge of 25% in addition to the baseline bond risk charges. A portion of the bond portfolio is invested in asset-backed securities, including residential mortgage-backed securities that are predominately agency pass-throughs and some collateralized mortgage obligations.

The remainder of the portfolio is primarily comprised of a moderate level of preferred and common stock, mortgage loans, alternatives, and some cash/short-term investments and policy loans. Mortgage loans are mainly backed by apartments, offices, industrial and retail space with some concentration in the mid-western states. The mortgage allocation is diversified by sector and maintains a conservative loan-to-value ratio and high debt service coverage. Virtually all loans have performed to original terms, with minimal loan restructurings and no foreclosures.

Americo monitors the volume of individual annuity business split by surrender charge and market value adjustment features, which limits asset-liability mismatch and liquidity risks. Americo also has a dynamic equity indexed annuity hedging program that has performed well.

Americo Investment Advisors, Inc. (TX) is a wholly-owned asset management company that provides investment management services exclusively to the Americo life insurance companies.

Holding Company Assessment

Financial Holding Corporation (FHC) is the ultimate parent company of Americo, and it was formed in 1984 by a controlling group that acquired its first life insurance company in 1972. ALI was formed for the purpose of holding the life insurance subsidiaries which include AFL, Great Southern Life, National Farmers Union Life Insurance Company, and most recently Ozark. United Fidelity Life Insurance Company, an intermediate holding company, has in-force life and annuity policies but does not currently write new business. In 2024, ALI's consolidated GAAP return on average equity excluding accumulated other comprehensive income, is within tolerance for the existing ratings.

FHC's primary holdings are the operations in the life insurance and annuity market, and the return and risk profile is largely that of its largest operating subsidiary writing new business, which is AFL. Americo's financial leverage and coverage ratios are within tolerance for the current rating levels. During 2021, Americo Life, Inc. issued \$400 million of senior unsecured notes with the primary purpose being to support the capital required for the increase in sales experienced by the operating insurance entities. Americo's access to debt markets increases its financial flexibility. Americo does not own any under-performing insurance subsidiaries that require support or pose a potential burden to the consolidated group.

Financial Leverage Summary - Holding Company

Financial Leverage Ratio (%)	24.00
Adjusted Financial Leverage Ratio (%)	24.20
Interest Coverage (x)	7.20

Operating Performance

Americo has maintained disciplined growth in top-line net premiums written, driven by increases in the individual deferred annuity, final expense and term life insurance lines of business. Americo has been able to offer a competitive guaranteed interest rate on its annuity products, which has contributed to the increase in sales. Americo has sold a number of simplified issue insurance products which

Operating Performance (Continued...)

include multiple cash back options, a monthly income option, and optional whole life insurance coverage at the end of the term period. These product variations have allowed Americo agents to more accurately fit the needs of customers. A strong track record of individual life insurance sales, has helped consumers close their protection gaps. With the acquisition of Ozark and other distribution initiatives, Americo has steadily diversified its distribution.

The group has reported somewhat volatile statutory operating and net income in some years, which reflects the strain that comes with selling high volumes of first year new life insurance and annuity premium, although strategic use of reinsurance with generally well-rated counter-parties has mitigated the impact of upfront acquisition costs and reserving strain. The group has reported a positive trend in normalized statutory pre-tax operating earnings, excluding the impacts of new business strain, which supports AM Best's view of the group's favorable underlying earnings quality. Dividends up-streamed to the parent companies have depended on amount of earnings and the companies' projected solvency ratios.

Net investment income remains strong as the company grows invested assets, adds higher yielding securities, and maintains its target annuity spread range in various economic conditions. Mortality experience has been in line with management's expectations. Americo's investment management and underwriting teams work closely to ensure that the company is not underwriting business that it will not be able to maintain profitably.

Business Profile

Americo's product distribution comprises many independent marketing organizations (IMOs) and independent agents. Americo has a relatively high percentage of agents that produce new business, and Americo actively contracts new agents to maintain its presence in the independent sales channel. AFL is licensed to operate in 49 states and the District of Columbia. On May 30, 2025, Ozark National Life Insurance Company (Ozark, TX) became a wholly owned subsidiary of AFL, which in turn, is indirectly wholly owned by Americo Life, Inc (ALI). AFL acquired Ozark to continue its strategic growth objectives in the U.S. life insurance market, where it has traditionally focused on closing mortality protection gaps through technology-driven application and underwriting processes.

The life insurance product portfolio mainly consists of individual final expense and term life insurance, and other whole life, universal life, indexed universal life insurance policies. These products are generally marketed to the middle-market as providing protection as well as wealth transfer benefits. Americo primarily targets the mortgage life insurance market for term life insurance sales growth offering 15-, 20-, 25-, and 30-year term life products that, along with available riders, provide customized income protection solutions to recent mortgagees. Term life insurance premiums have remained less than 20% of total life insurance over the last three years, however term life insurance has remained a steady and material contributor to the group's overall business profile. Americo introduced an indexed-universal life product in 2024. Americo's final expense products are simplified issue with level or graded death benefits.

Business Profile (Continued...)

Americo Financial Life Group's annuity product portfolio primarily offers qualified and non-qualified fixed and equity indexed annuities to the senior market. Equity indexed annuity products provide the policyowner with some upside potential based on equity market indices, but also protection against downward swings in these indices.

The group shows innovation through the use of its instant decision e-application for its life insurance products, which is an automated process that utilizes application questions, third party data, and internal underwriting rules to provide predictable, real time, point of sale decision without human intervention. This instant decision e-application is a competitive advantage as Americo has a high utilization rate with over 98% of policies being issued through this process, which allows Americo to meet the life insurance protection needs of a broad range of lives and to thereby limit anti-selection risk overall. Americo continues to make improvements under a strategy to grow its organizational structure and product and digital capabilities in an effort to be more competitive within its core markets.

Enterprise Risk Management

Americo's enterprise risk management (ERM) program encompasses all insurance entities within the group and includes a formal process for risk identification, risk measurement and determining risk appetite. These processes are all reviewed and updated on a regular basis by senior management. Americo has historically maintained a formal asset-liability management program. Its ERM function has been utilized in making critical business decisions such as which markets and products to serve and in determining risk limits for its investment portfolio. The ERM process includes a detailed analysis of both external and internal threats including cyber security. AM Best believes that Americo's ERM framework is structured to be consistent with the size and complexity of the organization. The group operationalizes its ERM through various committees. Quantitative stress tests are run for a range of scenarios including adverse pandemic, interest rate, bond default, mortgage foreclosure, policy lapse rates, and equity market performance.

Enterprise Risk Management (Continued...)**Reinsurance Summary**

Ozark entered into a strategic reinsurance transaction in 2025 with New Reinsurance Company Ltd (NewRe), a subsidiary of Munich Re, to alleviate the capital strain associated with Americo's acquisition of Ozark. This acquisition was also financed by Americo's own resources and some additional bank debt that was drawn by ALI. The reinsurance was structured as coinsurance funds withheld with experience refunds, which provides Ozark and Americo with some reserve relief at efficient terms. While Ozark's reinsurance dependence as measured by its reinsurance leverage ratio increased, the reinsurance is with a highly-rated group.

Americo has adequately incorporated reinsurance usage into its overall business strategy while simultaneously not detracting from its quality of capital. Americo uses new business reinsurance on mortgage term and final expense sales to alleviate some new sales strain and to share mortality risk. The group also uses some internal reinsurance with AFL coinsuring some individual life face amount to National Farmers Union Life.

Environmental, Social & Governance

AM Best considers Americo's environmental, social and governance (ESG) risks to be low.

BEST'S CREDIT REPORT

AMB #: 069530 - Americo Financial Life Group

A Best's Financial Strength Rating opinion addresses the relative ability of an insurer to meet its ongoing insurance obligations. The ratings are not assigned to specific insurance policies or contracts and do not address any other risk, including, but not limited to, an insurer's claims-payment policies or procedures; the ability of the insurer to dispute or deny claims payment on grounds of misrepresentation or fraud; or any specific liability contractually borne by the policy or contract holder. A Financial Strength Rating is not a recommendation to purchase, hold or terminate any insurance policy, contract or any other financial obligation issued by an insurer, nor does it address the suitability of any particular policy or contract for a specific purpose or purchaser.

A Best's Issue/Issuer Credit Rating is an opinion regarding the relative future credit risk of an entity, a credit commitment or a debt or debt-like security.

Credit risk is the risk that an entity may not meet its contractual, financial obligations as they come due. These credit ratings do not address any other risk, including but not limited to liquidity risk, market value risk or price volatility of rated securities. The rating is not a recommendation to buy, sell or hold any securities, insurance policies, contracts or any other financial obligations, nor does it address the suitability of any particular financial obligation for a specific purpose or purchaser.

In arriving at a rating decision, AM Best relies on third-party audited financial data and/or other information provided to it. While this information is believed to be reliable, AM Best does not independently verify the accuracy or reliability of the information. Any and all ratings, opinions and information contained herein are provided "as is," without any express or implied warranty.

For additional details, refer to our *Terms of Use* available at the AM BEST website: <https://web.ambest.com/about/terms-of-use>. All information contained herein was obtained by AM BEST from sources believed by it to be accurate and reliable. Notwithstanding the foregoing, AM BEST does not make any representation or warranty, expressed or implied, as to the accuracy or completeness of the information contained herein, and all such information is provided on an "as is" and "as available" basis, without any warranties of any kind, either express or implied. Under no circumstances shall AM BEST have any liability to any person or entity for (a) any loss or damage of any kind, in whole or in part caused by, resulting from, or relating to, any error (negligent or otherwise) or other circumstance or contingency within or outside the control of AM BEST or any of its directors, officers, employees, or agents in connection with the procurement, collection, compilation, analysis, interpretation, communication, publication or delivery of any such information, or (b) any direct, indirect, special, consequential, compensatory, punitive or incidental damages whatsoever (including without limitation, personal injury, pain and suffering, emotional distress, loss of revenue, loss of present or prospective profits, loss of business or anticipated savings, or loss of goodwill) resulting from the use of, or inability to use, any such information, in each case, regardless of (i) whether AM BEST was advised in advance of the possibility of such damages, (ii) whether such damages were foreseeable, and (iii) the legal or equitable theory (contract, tort or otherwise) upon which the claim is based. The credit ratings, performance assessments, financial reporting analysis, projections, and any other observation, position or conclusion constituting part of the information contained herein are, and shall be construed solely as, statements of opinion and not statements of fact or recommendations to purchase, sell or hold any securities, insurance policies, contracts or any other financial obligations, nor do they individually or collectively address the suitability of any particular financial obligation for a specific purpose or purchaser. Credit risk is the risk that an entity may not meet its contractual, financial obligations as they come due. Service performance risk is the risk that an entity may not meet its contractual service performance obligations on behalf of its insurance partners. Consequently, neither credit ratings nor performance assessments address any other risk, including but not limited to, liquidity risk, market value risk or price volatility of rated securities. NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY SUCH RATING OR ASSESSMENT OR OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY AM BEST IN ANY FORM OR MANNER WHATSOEVER. Each credit rating, performance assessment or other opinion must be weighed solely as one factor in any investment or purchasing decision made by or on behalf of any user of the information contained herein. Each such user will, with due care, make its own study and evaluation of each security or other financial obligation, and of each issuer and guarantor of, and each provider of credit support, and an independent view of service provider performance for, each security or other financial obligation that it may consider purchasing, holding, or selling or for each service contract that it may consider entering into. For additional detail on credit ratings or performance assessments, and their respective scales, usage, and limitations, refer to the Guide to Best's Credit Ratings (<https://www.ambest.com/ratings/index.html>) or the Guide to Best's Performance Assessments (<https://www.ambest.com/ratings/assessmentMethodology.html>).
